## **Planetary Citizenship:**

**Educating the Global Environmental Citizen** Greg William Misiaszek, 2017-12-15 Misiaszek examines the disconnection between critical global citizenship education models and ecopedagogy which is grounded in Paulo Freire's pedagogy. Exploring how concepts of citizenship are affected by globalization, this book argues that environmental pedagogues must teach critical environmental literacies in order for students to understand global environmental issues through the world's diverse perspectives. Misiaszek analyses the ways environmental pedagogies can use aspects of critical global citizenship education to better understand how environmental issues are contextually experienced and understood by societies locally and globally through issues of globalization, colonialism, socio-economics, gender, race, ethnicities, nationalities, indigenous issues, and spiritualities.

**Planetary Citizenship** Hazel Henderson, Daisaku Ikeda, 2004 Two world-renowned global activists explore the rise of grassroots globalists/citizens all over the world who are taking responsibility to build a more peaceful, harmonious, and sustainable future in this wide-ranging dialogue. They discuss their own backgrounds and what led them individually to activism on a world-wide scale. At the same time, they provide encouragement and concrete information for the millions of other concerned citizens who want to make a difference. A wide variety of issues that are now gaining greater recognition at all levels of society are explored, including sustainable development, economic justice, respect for indigenous peoples and their traditional lands and resources, democratising politics, and international institutions making corporations accountable and conserving the Earth's bio-diversity, water, air quality, and climate.

***Conversations on Global Citizenship Education*** Emiliano Bosio, 2021-02-01 This volume offers a remarkable collection of theoretically and practically grounded conversations with internationally recognized scholars who share their perspectives on Global Citizenship Education (GCE) in relation to university research, teaching, and learning. *Conversations on Global Citizenship Education* brings together the narratives of a diverse array of educators who share their unique experiences of navigating GCE in the modern university. Conversations focus on why and how educators' theoretical and empirical perspectives on GCE are essential for achieving an all-embracing GCE curriculum which underpins global peace. Drawing on the Freirean concept of conscientization, GCE is presented as an educational imperative to combat growing inequality, seeping nationalism, and post-truth politics. This timely volume will be of interest to educators who are seeking to develop their theoretical understanding of GCE into teaching practice, researchers, and students who are new to GCE and who seek dynamic starting points for their research, and a general audience who are interested in learning more about the history, philosophy, and practice of GCE.

***Ecopedagogy and the Global Environmental Citizen*** Greg William Misiaszek, 2025-03-31 This edited volume collates over a decade of Greg William Misiaszek's work on ecopedagogy with a new focus on insights and possibilities for global citizenship education (GCE) scholarship. Rooted in critical theories and originating from Paulo Freire's popular education models of Latin America, ecopedagogy is centered on understanding the struggles of and the connections between human

acts of environmental violence social injustices and Nature's unsustainability The book brings together diverse understandings of ecopedagogy introduces key concepts of teaching for local to planetary citizenship and explains how both are essential for socio environmental justice and planetary sustainability Grouped into three parts it includes new detailed introductions with crucial GCE threads explored throughout the chapters This includes discussions of how non critical teaching for environmentally sustainable development that opposes critical GCE's essence instills anti environmentalism rather than countering it As a comprehensive and fresh curation of Misiaszek's work on timely and critical topics it will appeal to academic scholars educational researchers teachers and social environmental movement leaders participants among others who have interests in GCE environmental sustainability sustainable development environmental teaching and social environmental justice

**Freire and Environmentalism** Greg William Misiaszek, 2023-05-18 Building on Paulo Freire's educational theory and critical pedagogy movements this book provides a short and accessible introduction to ecopedagogy Freirean environmental teaching and environmentalism overall Ecopedagogy offers a political and educational vision that strives for a critical culturally relevant forms of knowledge centred on sustainability for securing the future of our planet ending all forms of oppression and ensuring peace globally Using examples from around the globe Misiaszek shows how different populations e.g. gender race ethnicity are affected in unbalanced ways by ongoing environmental destruction and argues that these systematic socio environmental inequalities are ignored in much of environmental teaching He argues through reinventing Freire's work that environmental justice is inseparable to social justice and should be seen as part of wider debates around for example globalization development citizenship racism feminism neo colonialization and linguistics The book calls for global and local approaches to understanding socio environmental issues beyond anthropocentric models beyond humans and epistemologies of the North e.g. Western knowledges Written for anyone with an interest in environmentalism this book offers new ways of thinking and teaching about environmental crises we are living through
