*The Ethics of Nanotechnology, Geoengineering, and Clean Energy* Andrew Maynard, Jack Stilgoe, 2020-07-26  
Nanotechnology clean technology and geoengineering span the scale of human ingenuity from the imperceptibly small to the unimaginably large Yet they are united by a commonality of ethics that permeates how and why they are developed and how the resulting consequences are managed The articles in this volume provide a comprehensive account of current thinking around the ethics of development and use within each of the technological domains and addresses challenges and opportunities that cut across all three In particular the collection provides unique insights into the ethics of noumenal technologies technologies that are impossible to see or detect or conceive of with human senses or conventional tools This collection will be of relevance to anyone who is actively involved with ensuring the responsible and sustainable development of nanotechnology geoengineering or clean technology

*Green Politics and Civic Republicanism* Ashley Dodsworth, Iseult Honohan, 2022-08-15  
The political and environmental crises of the twenty first century require new approaches to the way we think and act politically This book explores the potential for engagement between green and civic republican thought as part of these new approaches The green and civic republican traditions have important historical and conceptual connections They share an emphasis on the idea of interdependence the common good as distinct from individual and sectional interests and a corresponding critique of freedom as non interference and of arguments for minimising the state Both see the human project as marked by vulnerability and the achievement of stability and sustainability as a critical though fragile goal in whose realisation the state must play a significant role Both focus accordingly on constitutional law active citizenship and participatory democracy and adopt a critical stance towards economic inequality and capitalist economic growth The chapters address these in a variety of ways from examining fundamental concepts freedom rights and political judgement through analysing the potential grounds for connections between green and republican political theory vulnerability limits sustainability and civic virtue to outlining the kind of agonistic republican politics and green political economy that these imply The chapters in this book were originally published as a special issue of *Critical Review of Social and Political Philosophy*

*Ignoring Nature No More* Marc Bekoff, 2013-06-01  
For far too long humans have been ignoring nature As the most dominant overproducing overconsuming big brained big footed arrogant and invasive species ever known we are wrecking the planet at an unprecedented rate And while science is important to our understanding of the impact we have on our environment it alone does not hold the answers to the current crisis nor does it get people to act In *Ignoring Nature No More* Marc Bekoff and a host of renowned contributors argue that we need a new mind set about nature one that centers on empathy compassion and being proactive This collection of diverse essays is the first book devoted to compassionate conservation a growing global movement that translates discussions and concerns about the well being of individuals species populations and ecosystems into action Written by leading scholars in a host of disciplines including biology psychology

sociology social work economics political science and philosophy as well as by locals doing fieldwork in their own countries the essays combine the most creative aspects of the current science of animal conservation with analyses of important psychological and sociocultural issues that encourage or vex stewardship The contributors tackle topics including the costs and benefits of conservation behavioral biology media coverage of animal welfare conservation psychology and scales of conservation from the local to the global Taken together the essays make a strong case for why we must replace our habits of domination and exploitation with compassionate conservation if we are to make the world a better place for nonhuman and human animals alike

Security in the Anthropocene Cameron Harrington, Clifford Shearing, 2017-08-15 The belief that Nature exists as a blank stable stage upon which humans act out tragic performances of international relations is no longer tenable In a world defined by human action we must reorient our understanding of ourselves of our environment and our security This book considers how decentred and reflexive approaches to security are required to cope with the Anthropocene the Human Age Drawing from various disciplines this bold reinterpretation explores the possibilities for understanding and preparing a future that will look vastly different than the past The book asks to dig deeper into what it means to be human and secure in an age of ecological exception In a growing field of interdisciplinary work on the Anthropocene Security in the Anthropocene sets itself apart It blends ideas from criminology international security studies and the environmental humanities to provide unique interdisciplinary insight into the challenges of living on an increasingly turbulent earth Audra Mitchell Balsillie School of International Affairs Wilfrid Laurier University This essential groundbreaking book offers a new conceptual framework that recalibrates what security means in the Anthropocene Not content on simply highlighting the state of crisis fostered by existential risks in this new era Cameron Harrington and Clifford Shearing invite us to imagine a more positive and caring form of security Benoit Dupont University of Montreal Harrington and Shearing's fine book explores evocatively how humans might cope with a world that is fundamentally changed through a critical appraisal of how new impacts on the Earth system shift the conditions of security This is a tour de force of how our concepts of security create the world that afflicts us The authors argue convincingly that there can be no security in the Anthropocene without an expanded vision of care John Braithwaite Australian National University
