## Markets Famines:

*Markets and Famines* Martin Ravallion, 1987 This is a study in the economics of famine Famines have often presented a challenge to economic thought Past debates have concerned the importance of aggregate food availability and the role of markets and governments in allocating limited food This book applies some modern methods of economic investigation to these issues A theory is presented which shows how the sharp increases in mortality observed during famines can arise without a decline in aggregate food availability Much of the book is devoted to a detailed empirical study of the causes of the adverse changes of food distribution which led to high mortality during the 1974 famine in Bangladesh The results throw new light on the way markets work during famines and on the effects of policies aimed at famine relief or prevention *Eating People Is Wrong, and Other Essays on Famine, Its Past, and Its Future* Cormac Ó Gráda, 2020-10-13 New perspectives on the history of famine and the possibility of a famine free world Famines are becoming smaller and rarer but optimism about the possibility of a famine free future must be tempered by the threat of global warming That is just one of the arguments that Cormac Gr da one of the world s leading authorities on the history and economics of famine develops in this wide ranging book which provides crucial new perspectives on key questions raised by famines around the globe between the seventeenth and twenty first centuries The book begins with a taboo topic Gr da argues that cannibalism while by no means a universal feature of famines and never responsible for more than a tiny proportion of famine deaths has probably been more common during very severe famines than previously thought The book goes on to offer new interpretations of two of the twentieth century s most notorious and controversial famines the Great Bengal Famine and the Chinese Great Leap Forward Famine Gr da questions the standard view of the Bengal Famine as a perfect example of market failure arguing instead that the primary cause was the unwillingness of colonial rulers to divert food from their war effort The book also addresses the role played by traders and speculators during famines more generally invoking evidence from famines in France Ireland Finland Malawi Niger and Somalia since the 1600s and overturning Adam Smith s claim that government attempts to solve food shortages always cause famines Thought provoking and important this is essential reading for historians economists demographers and anyone else who is interested in the history and possible future of famine *An Economic History of Famine Resilience* Jessica Dijkman, Bas van Leeuwen, 2019-09-18 Food crises have always tested societies This volume discusses societal resilience to food crises examining the responses and strategies at the societal level that effectively helped individuals and groups to cope with drops in food supply in various parts of the world over the past two millennia Societal responses can be coordinated by the state the market or civil society Here it is shown that it was often a combined effort but that there were significant variations between regions and periods The long term comparative perspective of the volume brings out these variations explains them and discusses their effects on societal resilience This book will be of interest to advanced students and researchers across economic history institutional economics social history and development studies **Mass**

**Starvation** Alex de Waal, 2017-12-08 The world almost conquered famine Until the 1980s this scourge killed ten million people every decade but by early 2000s mass starvation had all but disappeared Today famines are resurgent driven by war blockade hostility to humanitarian principles and a volatile global economy In *Mass Starvation* world renowned expert on humanitarian crisis and response Alex de Waal provides an authoritative history of modern famines their causes dimensions and why they ended He analyses starvation as a crime and breaks new ground in examining forced starvation as an instrument of genocide and war Refuting the enduring but erroneous view that attributes famine to overpopulation and natural disaster he shows how political decision or political failing is an essential element in every famine while the spread of democracy and human rights and the ending of wars were major factors in the near ending of this devastating phenomenon Hard hitting and deeply informed *Mass Starvation* explains why man made famine and the political decisions that could end it for good must once again become a top priority for the international community
