Marriage And Disability:

Disability Identity and Marriage in Rural China Jing Yang, 2017-11-22 Based on data collected through in depth fieldwork observation and interviews in Bai Township this book examines how women with disabilities in rural Southwest China compensate for their disability identity through marriage As the first book to theorize the married life of rural based women with different types of disabilities it provides a more holistic picture of their marital life by tracing the marriage process from mate selection to wedding ceremony reproduction and role performance It also generates a substantive theory grounded in the real experiences of women living with disabilities with Jing Yang arguing that these women are not passive victims in the marital process but active agents who endeavour to minimize the risk of abuse and maximize security and satisfaction in their marriage By examining the effects of fertility patriarchy and village society on women with disability this book will be of huge interest to students and scholars of many disciplines including disability studies sociology social work women s studies and Chinese culture and society

Disability Rabia Belt, 2015 Obergefell emphasizes the importance of marriage for dignity and emotional well being as well as recognizing all the economic and legal benefits that accrue to marriage The marriage equality movement in general aims to end economic disadvantage and cultural stigma towards nontraditional families Families with disabilities should also fulfill this mandate Suggested remedies include removing the marriage penalty for receiving federal disability benefits increased training and accommodation for supporting parents with disabilities and specialized care housing and laws for people with mental disabilities who wish to have sex parent or marry
