## **Marshall Plan Today Model And Metaphor:**

The Marshall Plan Today John Agnew, J. Nicholas Entrikin, 2004-06-24 This volume has as its focus the role of the Marshall Plan as both a force in the transformation of European Economic practices and a stimulus to political integration in Europe This organizing theme is framed in terms of two other issues that are central to contemporary debates in international political economy and geopolitical studies the origins and development of the Cold War and the growing globalisation of the world economy In relating the Marshall Plan to these issues this book goes beyond the typical diplomatic history approach to place the Plan in the context of both the political economy of late twentieth century Europe and the impact of American models of business and government that came with the Plan

The United States, Italy and the Origins of Cold War Kaeten Mistry, 2014-05-15 This international history of the origins and nature of cold war offers the first systematic examination of the complex relationship between the United States and Italy and of American debates about warfare in the years between World War II and the Korean War Kaeten Mistry reveals how the defeat of the Marxist left in the 1948 Italian election was perceived as a victory for the United States amidst a war short of war as defined by influential planner George Kennan becoming an allegory for cold war in American minds The book analyses how political warfare sought to employ covert operations overt tactics and propaganda in a coordinated offensive against international communism Charting the critical contribution of a broad network of local religious civic labour and business groups Mistry reveals how the notion of a specific American success paved the way for a problematic future for US Italian relations and American political warfare

**East Asia's Strategic Advantage in the Middle East** Shirzad Azad, 2021-05-07 The modern trajectory of Middle Eastern East Asian interactions has garnered very little scholarly attention and scrutiny The two way connection between both regions have witnessed a litany of activities and developments over the past several decades but such dynamics are yet to be investigated sufficiently in tandem with their

overall impacts on the world's safety and well-being. Aiming to fill part of this acute research gap, *East Asia's Strategic Advantage in the Middle East* concentrates primarily on different aspects of East Asia's modern relationship with the Middle East by turning the spotlight on strategic advantages of East Asian countries in critical areas in the region. Over the past several years, there have been a slew of talks and debates about the formation of strategic ties between the East Asian states and their counterparts across the Middle East region. However, East Asia's advantage of strategic nature has been there for decades, shaping the contours of an increasingly multifaceted chain of interactions involving the two sides. The more other stakeholders, Western powers in particular, made serious attempts to secure their precious assets in the Middle East, the larger East Asia's strategic advantage in the region grew.

*Levelling Up Left Behind Places* Ron Martin, Ben Gardiner, Andy Pike, Peter Sunley, Peter Tyler, 2021-12-24. This book aims to understand the predicaments of left behind places and the scale of the policy challenge of levelling up their economic prosperity. Drawing out lessons of wider international significance, it examines how places, cities, towns, and localities have grown apart over recent decades amidst deindustrialisation, post-industrial transition, and the disruptive shocks of the global financial crisis and COVID-19 pandemic. Using the UK case to illustrate its arguments, the analysis identifies the different types of left behind places and their distinctive economic experiences. The key features of urban and regional institutions and policies are reviewed to understand more about why, despite some successes, geographical inequalities remain an entrenched feature of the UK, blighting the life chances and quality of life of its citizens and national economic progress as a whole. The weaknesses of past policies are highlighted, and the case is made for a new mission-oriented policy model because only a radical shift in economic thinking, governance, and management is likely to achieve the levelling up that is now a prominent refrain in the political lexicon.

*Negotiating Modernization Through U.S. Foreign Assistance* Burcak Keskin Kozat, 2006. *In Search of a Usable Past* Barry Machado, 2007. In recent years, the Marshall Plan has been invoked on numerous occasions as a solution for problems domestic and foreign. This study aims to establish the relevance for contemporary postwar reconstruction projects of an experimental foreign policy conceived and executed back in the late 1940s and early 1950s. The monograph clarifies why and how the Marshall Plan was adopted, what its essential features were, and why it succeeded in western Europe, concluding that it had important and mutually reinforcing aspects: political, psychological, and economic. He rejects charges that biological explanations of behavior are reductivist or determinist, and he explains the circularity of explaining culture in terms of culture. Levin's
