People Knowledge And Technology:

Investing in E-Health: People, Knowledge and Technology for a Healthy Future H. Grain, F. Martin-Sanchez, L.K. Schaper, 2014-08-14 As healthcare organisations and governments look to information technology to capitalise and enhance healthcare the need for effective investment to update existing technology and provide cost effective infrastructure for the future becomes clear The issues of defining success and understanding opportunities are crucial to planning optimum investment and the best use of scarce resources This book presents papers from the Australian Health Informatics Conference HIC 2014 held in Melbourne Australia in August 2014 With the theme of investing in e health people knowledge and technology for a healthy future the papers delivered at the conference and included here address the issues of building a future focused scalable and adaptable infrastructure and of training the healthcare workforce necessary to support it Subjects covered include user participation in ICT development for older adults interactive patient websites application areas of multi user virtual environments in the healthcare context as well as governance training and assessing the quality of data in public health information systems The book will be of interest to all those policy makers and practitioners involved in the planning and implementation of information technology projects as part of the healthcare system

Knowledge Technology Yoshiteru Nakamori, 2021-07-10 This book reviews creative technologies that underpin the human activities of converting data and information into knowledge creating new ideas based on that knowledge and validating those ideas The book calls such creative technology knowledge technology and explores its challenges in the age of big data Today artificial intelligence and big data are successfully performing pattern recognition and decision making on behalf of humans who are incapable of processing large amounts of information instantly and accurately In using only past data however there are limits to future predictions with artificial intelligence and big data Humans need to take the lead in predicting or creating the future by trying to understand why data emerged Knowledge technology contributes to that understanding regardless of the field of origin As a matter of fact knowledge technology includes many technologies developed in informatics management study and systems science The desirable features of knowledge technology are the complementary use of rational and intuitive approaches the integration of results from quantitative and qualitative analyses and the cooperation between artificial intelligence and humans

Knowledge Technology and Systems Yoshiteru Nakamori, 2023-07-15 This book discusses technology and systems to create valuable ideas from data through the construction of knowledge The primary concern is to make better decisions about economic and management issues in today s information flooded society Human creative activity is in the realm of soft technology with no physical entity to operate Focusing on the ability of knowledge as judgment power this definition results Knowledge technology is soft technology that underpins the human creative activities of converting data and information into knowledge creating new ideas based on that knowledge and validating those ideas That definition includes a wide range of soft technologies developed in informatics management studies and systems science

The knowledge system creates ideas from data and knowledge through knowledge technologies Based on the proposition that knowledge emerges by the interaction between explicit and tacit knowledge another definition is possible The knowledge system is a system that promotes interaction between codified and personalized knowledge and creates ideas for solving a specific problem Codified knowledge includes data and information while personalized knowledge is empirical knowledge or wisdom that is difficult to put into words Building a knowledge system requires mathematical or intelligent knowledge technology and participatory knowledge technology to create or manage codified knowledge and personalized knowledge For example a company builds cross sectional knowledge systems by gathering human resources from various departments according to the purpose as in new product development or sales promotion Chapter 1 defines knowledge technology and the knowledge system and organizes the challenges in their development while Chapters 2 through 9 introduce mathematical or intelligent knowledge technologies by researchers at the forefront of knowledge technology development
