each variation to the next level Remember that sex is not only about penetration Learn to incorporate your hands fingers and mouth not just your genitals When we go into sex with just the genitals in mind we inevitably ignore other aspects of feeling and touch By making sex a full body experience we foster mind body connection The anus perineum testicles breasts and nipples for both men and women are all highly erogenous zones Don't ignore these areas Sex does not have to be goal oriented The positions in this book focus on man woman positions so each variation involves an aspect of intercourse This does not mean that intercourse must take place for the pose to be successful nor does it mean that orgasm is a requirement either Attempting the pose alone can provide a lot of fun and excitement Remember to enjoy the experience and not focus on the goal of orgasm Speaking of orgasm considering the fact that most of the poses include an element of penis vaginal penetration it is important to note that vaginal orgasms are not the norm for a majority of women While some women do experience the G spot orgasm this is not going to be true for every woman The G spot is located inside the vagina on the anterior wall More common is the clitoral orgasm The clitoris is found outside of the vagina near the front of her labia and above the urethra The vagina does have some sensitive spots such as the G spot however in terms of nerve endings relatively speaking the clitoris is much more sensitive Consider adding sex toys to your sexual repertoire Including toys allows us to think outside of the box and encourages a healthy sexuality that emphasizes growth and learning When we add toys we also remind ourselves that sex is about having fun and experimenting with what feels good I can't speak highly enough about lubrication Whether or not we are naturally lubricated is not necessarily an indication of whether or not we are emotionally aroused The two are not mutually exclusive If both partners agree this is something they want then lube is your best friend Having a few good types of lube on hand is a good idea Water based lubes are best if using condoms Organic lubes will have the least irritants Silicone based lubes will be the slickest but may not be great when used with silicone toys Avoid lubes with parabens and glycerin because they can cause irritation There are a lot of lubes out there so experiment to find what works for you and your partner Condoms are always a good idea unless you are in a long term monogamous relationship and or both parties are sharing sexually transmitted disease STD sexually transmitted infection STI results Another option for safe sex is mutual masturbation Whether you are touching yourself and or touching each other if no fluids are exchanged you are less likely to contract an STI or HIV Also mutual masturbation can be a highly erotic experience connecting two people in a very intimate way So definitely don't count this out Sex has endless possibilities when you open your mind and let your imagination run wild So get out there start exploring and start growing and learning Whether you are seeking daring adventures or just trying to learn something new remember to be safe and have fun
