Securing Eternity Reg J. Clark, 2019 The ancient Egyptian tomb evolved rapidly over a period of about 2 500 years from a simple backfilled pit to an enormous stone pyramid with complex security arrangements Much of this development was arguably driven by the ever present threat of tomb robbery which compelled tomb builders to introduce special architectural measures to prevent it However until now most scholarly Egyptological discussions of tomb security have tended to be brief and usually included only as part of a larger work the topic instead being the subject of lurid speculation and fantasy in novels the popular press and cinema In Securing Eternity Reg Clark traces in detail the development of the Egyptian royal and private tombs from the
