Improving the Quality of Life David M. Romney, Roy I. Brown, Prem S. Fry, 2012-12-06. The book is unique in two distinct ways. First it focuses on improving quality of life in contrast to other books that have tended to focus more on its conceptualization and assessment. Second it deals with improving quality of life in a variety of disabled populations not just one and includes chapters on people with chronic mental or physical conditions and those without disabilities at all i.e. so called normal people. The book outlines some of the challenges and controversies in the quality of life domain and attempts to synthesize the key issue and to draw generalizable conclusions. The book is mainly for university students and faculty and practitioners from various disciplines working in the field. It will also interest those members of the general public who wish to improve their own quality of life or that of their relatives or friends.

Disability & the Politics of Education Susan Lynn Gabel, Scot Danforth, 2008. Disability and the Politics of Education: An International Reader is a rich resource that deals comprehensively with the many aspects of the complex topic of disability studies in education. For nearly two decades global attention has been given to education as a human right through global initiatives such as Education for All (EFA) and the Salamanca Statement. Yet according to UNESCO reaching the goals of EFA remains one of the most daunting challenges facing the global community. Today millions of the world's disabled children cannot obtain a basic childhood education particularly in countries with limited resources. Even in the wealthiest countries many disabled children and youth are educationally segregated from the nondisabled particularly if they are labeled with significant cognitive impairment. International agencies such as the United Nations and the World Bank have generated funds for educational development but unfortunately these funds are administered with the assumption that west is best thereby urging developing countries to mimic educational policies in the United States and the United Kingdom in order to prove their aid worthiness. This McDonaldization of education reproduces the labeling, resource allocation and social dynamics long criticized in disability studies. The authors in this volume explore these subjects and other complexities of

disability and the politics of education In doing so they demonstrate the importance and usefulness of international perspectives and comparative approaches
