of commoditization that challenge all designers in today's competitive environment. The text is augmented and supported by chapters from twenty-two authoritative contributors, a foreword authored by Eugene Hopkins, and illustrations by graphic artist Michael Lindell. Handbook of Regions and Competitiveness Robert Huggins, Piers Thompson, 2017-03-31. The aim of this Handbook is to take stock of regional competitiveness and complementary concepts as a means of presenting a state-of-the-art discussion of the contemporary theories, perspectives, and empirical explanations that help make sense of the determinants of uneven development across regions. Drawing on an international field of leading scholars, the book is assembled and organized so that readers can first learn about the theoretical underpinnings of regional competitiveness and development theory before moving on to deeper discussions of key factors and principal elements, the emergence of allied concepts, empirical applications, and the policy context.

The Northwestern Miller, 1896. *Management of Technology and Operations*. R. Ray Gehani, 1998-09-14. An accessible source of winning technology management strategies. For working engineers and managers in technology-driven organizations of any size, this book provides a common understanding of the goals and methods of managing technology and operations. It is also an excellent text for upper-level undergraduate and graduate students in science, engineering, and business.
