Nareen Charles Bruce Pitblado, Edwy Guthrie Pitblado, 1908 Comparative Views on Origins Brock Lee, 2009-12 Brock Lee's debut book stands alone in the creation vs evolution debate. He documents and compares 23 views on the origins of man, applying the microscope of true science to each view. Systematically, Lee demonstrates how each view stacks up to proven science. The book will either strengthen readers' views or force them to choose between what is true and what is proven to be fraud. His extensive footnotes are as fascinating as the main text. The Top 10 Myths about Evolution Cameron M. Smith, 2009-09-25 In this concise, accessible myth busters handbook, two renowned educators clearly dispel the ten most common myths about evolution. Using a refreshing jargon-free style, they set the record straight that evolution is just a theory. Written by developers at Beehive Electronic Media Inc, one of the world's leading Zope consulting firms, Zope Web Application Construction Kit provides readers with a practical, straightforward guide along with all the needed software to setting up and developing powerful Web applications using Zope. **Building Blocks in Science** Dr. Gary Parker, 2007-11-01 Have you ever wondered about human fossils, cave men, skin color, ape men, or why missing links are still missing? Want to discover when T-Rex was small enough to fit in your hand? Or how old dinosaur fossils are and how we know the age of these bones? Learn how the Bible's world view, not evolution's, unites evidence from science and history into a solid creation foundation for understanding the origin, history, and destiny of life, including yours. Start reinforcing a strong foundation for learning with study questions, discussions, discussion topics, and more for home and school educators. In this fascinating book, Gary Parker explores some of the most interesting areas of science: fossils, the errors of evolution, the evidence of creation, all about early man and human origins, dinosaurs, and even races. Learn how scientists use evidence in the present, how historians use evidence of the past, and discover the biblical world view, not evolution, that puts the two together in a credible and scientifically sound way. Having made his own journey of discovery, this former evolutionary biologist and popular author offers a unique and powerful perspective on the science of our world, past and present.
