Professions Jerry W. Koehler, John I. Sisco, 1981 **The Public Administration Theory Primer** H. George Frederickson, Kevin B. Smith, Christopher Larimer, Michael J. Licari, 2018-04-17 The Public Administration Theory Primer explores how the science and art of public administration is definable, describable, replicable, and cumulative. The authors survey a broad range of theories and analytical approaches from public institutional theory to theories of governance and consider which are the most promising, influential, and important for the field. This book paints a full picture of how these theories contribute to and explain what we know about public administration today. The third edition is fully revised and updated to reflect the latest developments and research in the field, including more coverage of governments and governance, feminist theory, emotional labor theory, and grounded research methodology. Expanded chapter conclusions and a brand new online supplement with sample comprehensive exam questions and summary tables make this an even more valuable resource for all public administration students. *Paperbound Books in Print*, 1983 **Public Communication Campaigns** Ronald E. Rice, Charles K. Atkin, 1989-06 In 1981 the first edition of Public Communication Campaigns effectively presented the state of the art in public communication campaigns. Program managers, policymakers, administrators, and evaluators brought together valuable perspectives on influencing public knowledge, attitudes, and behavior. The second edition of Public Communication Campaigns continues this tradition, bringing to bear the continual advances and challenges in campaign theorizing and research over the past decade. Original chapters from the first edition are significantly revised, providing a fuller body of research and experience. Relevant case studies, such as the Stanford Heart Disease Prevention Project and studies of cancer and antismoking campaigns, serve to broaden and enrich these discussions. New chapters include a highly innovative campaign sampler that sketches 11 notable campaigns and their implications and provides historical context for more recent studies. Here is a tutorial on formative evaluation, a discussion of community campaigns, a systems-based evaluation planning methodology, an evaluation of television soap operas as campaign tools, and timely analyses of the conduct of political campaigns and the use of persuasion in adolescent AIDS prevention campaigns. An insightful closing chapter by Larry Wallack challenges some of the basic campaign assumptions about the role of mass media. Like its enlightening predecessor, this volume will play an important role in communication efforts to improve the lives of individuals and society. By scholars, policy makers, researchers, practitioners, planners, and evaluators. Most readers will find the book valuable. The book's scope guarantees some sustenance for all. It packages some impressive pieces by researchers of theoretical and methodological sophistication who have applied their expertise to specific problems. For those interested in the present state of thinking about public communication campaigns, this volume is most useful. *Canadian Journal of Communication* **Catalog of Copyright Entries, Fourth Series** Library of Congress, Copyright Office, 1978-04 **Threatening Communications and Behavior** National Research Council, Division of Behavioral and Social Sciences and Education, Board on Behavioral, Cognitive, and Sensory Sciences, 2011-04-21 Today's world of rapid social technological

and behavioral change provides new opportunities for communications with few limitations of time and space Through these communications people leave behind an ever growing collection of traces of their daily activities including digital footprints provided by text voice and other modes of communication Meanwhile new techniques for aggregating and evaluating diverse and multimodal information sources are available to security services that must reliably identify communications indicating a high likelihood of future violence In the context of this changed and changing world of communications and behavior the Board on Behavioral Cognitive and Sensory Sciences of the National Research Council presents this volume of three papers as one portion of the vast subject of threatening communications and behavior The papers review the behavioral and social sciences research on the likelihood that someone who engages in abnormal and or threatening communications will actually then try to do harm The focus is on how the scientific knowledge can inform and advance future research on threat assessments in part by considering the approaches and techniques used to analyze communications and behavior in the dynamic context of today s world The papers in the collection were written within the context of protecting high profile public figures from potential attach or harm The research however is broadly applicable to U S national security including potential applications for analysis of communications from leaders of hostile nations and public threats from terrorist groups This work highlights the complex psychology of threatening communications and behavior and it offers knowledge and perspectives from multiple domains that contribute to a deeper understanding of the value of communications in predicting and preventing violent behaviors
