Religion As Critique Irfan Ahmad, 2017 *Critique of Hinduism and Other Religions* Lakshmaṇaśāstrī Jośī, 1996

Choice and Religion Steve Bruce, 1999 The orthodox view is that the democracies of the western world have become increasingly secular over the twentieth century Fewer and fewer people have chosen to believe and the church has declined markedly as religion has changed from being part of an identity ascribed at birth to being a matter of personal choice Choice and Religion provides a detailed critique of the rational choice approach to religion to demonstrate that industrialisation has secularised the western world and that diversity far from making religion more popular by allowing individuals to maximize their returns undermines it The claim that diversity and competition promote religion is refuted with evidence from a wide variety of western societies Bruce examine the Nordic countries and the ex communist states of eastern Europe to explore the consequences of different sorts of state regulation and to show that ethnicity is a more powerful determinate of religious change than market structures Where religion matters it is not because individuals are maximising their returns it is because it defines group identity and is heavily implicated in social conflict **Religion as Critique** Robert John Ackermann, 1985 While science renews itself by refuting and replacing pictures of how the world is religion derives its longevity from the ability to create images of how the world ought to be In this view religions arise as legitimate protests against prevailing ways of life that is as forms of critique Robert Ackermann here explores this idea considering the manner in which six major religion systems Christianity Judaism Islam Marxism Hinduism and Buddhism articulate critique This approach differs markedly from most contemporary philosophy of religion which the author believes has grown sterile by seeing its task as the logical analysis of religions viewed as collections of dogmata He proposes instead that one see the major religions as both dead and alive dead in their orthodoxy but alive in providing a source of critical ideas for evaluating surrounding society After indicating the latent possibilities for social critique in such issues as environmental concerns war and the status of women Ackermann turns to the history of Christianity in the United States He utilizes the grid group analysis of Mary Douglas and ideas from Thomas Luckmann Robert Bellah and John Cuddihy to trace Christianity's evolution from confrontation to quiet accommodation Ackermann demonstrates that currently privatized versions of Christianity have lost out to a largely unnoticed civil religion whose critical resources are too impoverished to provide more than short term social steering In this situation Christianity's critical potential is unlikely to be noticed particularly by those who turn to other religious traditions for critical perspectives on contemporary society **Analytic Theology and the Academic Study of Religion** William Wood, 2021-01-28 Analytic theology can flourish in the secular academy and flourish as authentically Christian theology Analytic Theology and the Academic Study of Religion explains analytic theology to other theologians and scholars of religion while simultaneously explaining those other fields to analytic theologians William Wood defends analytic theology from some common criticisms but also argues that analytic theologians have much to learn from other forms of

inquiry Analytic theology is a legitimate form of theology and a legitimate form of academic inquiry and it can be a valuable conversation partner within the wider religious studies academy Analytic Theology and the Academic Study of Religion articulates an attractive vision of analytic theology fosters a more fruitful inter disciplinary conversation and enables scholars across the religious studies academy to understand one another better
