Modeling And Control Of Biotechnical Processes 1992:

Modeling and Control of Biotechnical Processes 1992, (2nd IFAC Symposium) and Computer Applications in Fermentation Technology (5th International Conference) Mohammed Nazmul Karim, G. Stephanopoulos, 1992

Hardbound This volume provides the state of the art findings of control theory and applications of biotechnical processes Topics covered include neural networks and their applications modeling identification AI and expert systems

Neural Networks in Bioprocessing and Chemical Engineering D. R. Baughman, Y. A. Liu, 2014-06-28

Neural networks have received a great deal of attention among scientists and engineers In chemical engineering neural computing has moved from pioneering projects toward mainstream industrial applications This book introduces the fundamental principles of neural computing and is the first to focus on its practical applications in bioprocessing and chemical engineering Examples problems and 10 detailed case studies demonstrate how to develop train and apply neural networks A disk containing input data files for all illustrative examples case studies and practice problems provides the opportunity for hands on experience An important goal of the book is to help the student or practitioner learn and implement neural networks quickly and inexpensively using commercially available PC based software tools Detailed network specifications and training procedures are included for all neural network examples discussed in the book Each chapter contains an introduction chapter summary references to further reading practice problems and a section on nomenclature Includes a PC compatible disk containing input data files for examples case studies and practice problems Presents 10 detailed case studies Contains an extensive glossary explaining terminology used in neural network applications in science and engineering Provides examples problems and ten detailed case studies of neural computing applications including Process fault diagnosis of a chemical reactor Leonard Kramer fault classification problem Process fault diagnosis for an unsteady state continuous stirred tank reactor system Classification of protein secondary structure categories Quantitative prediction and regression analysis of complex chemical kinetics Software based sensors for quantitative predictions of product compositions from fluorescent spectra in bioprocessing Quality control and optimization of an autoclave curing process for manufacturing composite materials Predictive modeling of an experimental batch fermentation process Supervisory control of the Tennessee Eastman plantwide control problem Predictive modeling and optimal design of extractive bioseparation in aqueous two phase systems

Modelling and Control of National Economies 1992 Xuyan Tu, 1993 Hardbound This meeting provided a forum for the exchange of ideas and information on modelling and control of national economies among scientists economists and engineers from around the world The proceedings are separated into three parts Part I Modelling and Control is concerned with macro economic models growth models input output models state space models and evaluation models adaptive control optimal control coordinated decentralized control and predictive control policies and evaluation methods Part II Games Forecasting and Optimization includes papers related to nonconvex games multiobjective decision making macro economic

Biotechnology for the Environment: Wastewater Treatment and Modeling, Waste Gas Handling Spiros

Agathos, W. Reineke, 2013-04-17 At the dawn of the 21st century biotechnology is emerging as a key enabling technology for sustainable environmental protection and stewardship Biotechnology for the Environment Wastewater Treatment and Modeling Waste Gas Handling illustrates the current technological applications of microorganisms in wastewater treatment and in the control of waste gas emissions In the first section of the book special emphasis is placed on the use of rigorous mathematical and conceptual models for an in depth understanding of the complex biology and engineering aspects underlying the operation of modern wastewater treatment installations The second part addresses waste gas biofiltration an expanding biotechnological application of microbial metabolism for air quality assurance through processes ranging from the abatement of hazardous volatile pollutants to the elimination of nuisance odors It will be a valuable reference source for environmental scientists engineers and decision makers involved in the development evaluation or implementation of biological treatment systems For more information on Strategy and Fundamentals see Focus on Biotechnology Volume 3A and for more information on Soil Remediation see Focus on Biotechnology Volume 3B *The Engineering Index Annual*, 1993 Since its creation in 1884 Engineering Index has covered virtually every major engineering innovation from around the world It serves as the historical record of virtually every major engineering innovation of the 20th century Recent content is a vital resource for current awareness new production information technological forecasting and competitive intelligence The world s most comprehensive interdisciplinary engineering database Engineering Index contains over 10 7 million records Each year over 500 000 new abstracts are added from over 5 000 scholarly journals trade magazines and conference
