Brown, 2020-03-17 *The Ancient Beginnings of Science From Pre Science to the Age of Greece With Modern Day Applications* By Ronald A Brown For more than 2 500 years it has been assumed that science and mathematics originated solely in ancient Greece however this assumption is now known to be invalid Recently available knowledge has shown that the ancient Hindus must also be included as one of the earliest precursors of modern mathematics and science according to a set of criteria developed by Ronald A Brown namely the trifecta of philosophy theory and abstract mathematics This trifecta implies that only the early Hindus and Greeks are true forerunners of modern science as they alone were the first to recognize that nature is rational and can therefore be understood by human reason The ensuing developments including selected modern topics are discussed in historical detail and demonstrate that the role of history is to clarify what is significant what remains after having distilled out what is not essential **The Oxford Book of Children's Verse in America** Donald Hall, 1985

Katsos,2023-02-14 This volume critically re evaluates the received interpretation of the nature of light in the ancient sources Isidoros C Katsos contests the prevalent view in the history of optics according to which pre modernity theorized light as subordinate to sight oculocentrism by examining in depth the contrary textual evidence found in early Christian texts It shows that from Philo of Alexandria and Origen to Basil of Caesarea and Gregory of Nyssa the Jewish Christian commentary tradition on the hexaemeral literature the biblical creation narrative reflected deeply on the nature and physicality of light for the purposes of understanding the structure and purpose of material creation Contemplation of nature allowed early Christian thinkers to conceptualize light as the explanatory principle of vision rather than subordinated to it Contrary to the prevalent view the hexaemeral literature necessitates a luminocentric interpretation of the theory of light of Plato s Timaeus in its reception history in the context of late antique cosmology Hexaemeral luminocentrism invites the reader of Scripture to grasp not only the sensible properties of light but also their causal principle as the first manifestation of the divine Logos in creation The hexaemeral metaphysics thus provides the missing ground of meaning of the early Christian language of light
