Mutual Aid Petr Alekseevich Kropotkin (kniꞑaꞑz'), 1904 *Mutual Aid* Peter Harry Kropotkin, 2010-12

Mutual Aid A Factor of Evolution is a book by Peter Kropotkin on the subject of mutual aid written while he was living in exile in England. It was first published by William Heinemann in London in October 1902. The individual chapters had originally been published in 1890-96 as a series of essays in the British monthly literary magazine *Nineteenth Century*. Written partly in response to Social Darwinism and in particular to Thomas H. Huxley's *Nineteenth Century* essay *The Struggle for Existence*, Kropotkin's book drew on his experiences in scientific expeditions in Siberia to illustrate the phenomenon of cooperation. After examining the evidence of cooperation in nonhuman animals, savages, barbarians in medieval cities and in modern times, he concludes that cooperation and mutual aid are as important in the evolution of the species as competition and mutual strife, if not more so.

Peter Kropotkin initially published the chapters of *Mutual Aid* as individual essays in the intellectual periodical *The Nineteenth Century* over the course of six years. In 1902 the essays were published as a book. In it, Kropotkin explores the role of mutually beneficial cooperation across both animal and human societies. He begins by outlining how animals both within and across species thrive not through individual fitness but rather through mutual cooperation. He then extends the breadth of his study to ancient human societies across generations and nations until arriving at modern society, which he suggests has largely dispensed with the ancient benefits of mutual aid in favor of private property, capitalism, and social Darwinism. Though more of a philosophical work than a scientific work, many of Kropotkin's observations of the animal kingdom are considered to be scientifically accurate today, with Douglas H. Boucher calling *Mutual Aid* a precursor to the theory of biological altruism. As a philosophical work, *Mutual Aid* along with his other work *The Conquest of Bread* is recognized as a foundational text of the anarcho-communist political philosophy.

Mutual Aid A Factor of Evolution is a book written by Peter Kropotkin and originally published as a series of articles in a British literary magazine. Kropotkin was a well-known zoologist, evolutionary theorist, and communist, and his ideas often challenged those of Charles Darwin. *Mutual Aid* is Kropotkin's examination of mutual aid, a theory of social organization that championed cooperation and reciprocity between members of a species for the betterment of the group. Kropotkin's view challenged the beliefs of Social Darwinists, who believed competition between members of a species inherently promoted evolution and survival of the group. Kropotkin begins his book with an examination of mutual aid in the animal kingdom, where he includes examples of ants, bees, birds, large cats, wolves, and more. Kropotkin continues with a discussion of mutual aid in human societies, examining both ancient civilizations as well as modern humans. The book concludes with an appendix and detailed index. Kropotkin's work is a fascinating read and presents a theory every bit as worthy of consideration as Darwinism. The author does not deny the importance of competition in the advancement of a species but rather argues that cooperation and mutual aid have been underappreciated aspects of man's proliferation on

the contention of contemporary ecologists that the world of nature is one of interdependence rather than strife Born in 1942 into an ancient military family of Russian princes Peter Alexeivich Kropotkin was selected as a child for the elite Corps of Pages by Czar Nicholas I himself Shortly before his death in 1921 Kropotkin had moved so far from his aristocratic beginnings and had attained such stature as a libertarian leader that he could with impunity to Lenin e Vladimir Ilyich your actions are completely unworthy of the ideas you pretend to hold e Kropotkin provides a potent argument for anarchism by showing that people tend to cooperate spontaneously and that the state destroys this natural inclination towards mutual aid by strangling initiative with the dead hand of regulation With the exception of his memoirs this is Kropotkin s best known work and it is widely regarded as his masterpiece It forms the cornerstone of his philosophy and constitutes the most successful attempt by any writer to put anarchism on a scientific foundation Mutual Aid is still the best refutation of the Darwinian thesis of survival of the fittest
