*Micro Man* Gordon Pask, Susan Curran, 1982      [For the Love of Cybernetics](#) Jocelyn Chapman, 2020-05-21 *For the Love of Cybernetics Personal Narratives* by Cyberneticians is a collection of personal accounts that offer unique insights into cybernetics via the personal journeys of nine individuals For the authors in this collection cybernetics is not their area of interest it is how they think about what they do and it is their practice Ray Ison Bruce Clarke Frank Galuzska Paul Pangaro Klaus Krippendorff Peter Tuddenham Lucas Pawlik Bernard Scott and Jocelyn Chapman differ in their lineage emphasis and engagement with cybernetics What they have in common is that they share the belief that cybernetics is not a tool to apply here and there but a unifying way of seeing the world that transforms how we behave thus increasing possibilities for positive systemic change This book was originally published as a special issue of the journal *World Futures*      [Computer Book Review](#) ,1983-07      [Philosophy and Technology II](#) Carl Mitcham, Alois Huning, 2012-12-06 Until recently the philosophy and history of science proceeded in a separate way from the philosophy and history of technology and indeed with respect to both science and technology philosophical and historical inquiries were also following their separate ways Now we see in the past quarter century how the philosophy of science has been profoundly influenced by historical studies of the sciences and no longer concerned so single mindedly with the analysis of theory and explanation with the relation between hypotheses and experimental observation Now also we see the traditional historical studies of technology supplemented by philosophical questions and no longer so plainly focussed upon contexts of application on invention and practical engineering and on the mutually stimulating relations between technology and society Further alas the neat division of intellectual labor those clearly drawn distinctions between science and technology between the theoretical and the applied between discovery and justification between internalist and externalist approaches all have become muddled Partly this is due to internal revolutions within the philosophy and history of science the first result being recognition of their mutual relevance Partly however this state of muddle is due to external factors science at the least in the last half century has become so intimately connected with technology and technological developments have created so many new fields of scientific and philosophical inquiry that any critical reflection on scientific and technological endeavors must henceforth take their interaction into account      *Datamation* ,1983      **Victorians Institute Journal** Victorians Institute, 1987      [War with the Robots](#) Isaac Asimov, Patricia S.
