Data objects:

A data object is a part of the repository whose content can be addressed and interpreted by the program

Physical units with which ABAP statements work at runtime.

Contents occupy memory space in a program

ABAP Statements access the contents by addressing the name of the data object

ABAP Statements can write the contents of Data object in report or in the database and also pass/receive from routines and can be changed by assigning new values

Declare objects statically or dynamically

ABAP Data object has a set of technical attributes, defined at all times when the ABAP program is running

Data Types

Data Types can be defined independently,

The definition of a user-defined data type is based on a set of predefined elementary data types.

Define data types either locally in the declaration part of a program using TYPES Statement or globally in the ABAP Dictionary.

Use own data types to declare data objects or to check the types of parameters in generic operations.

Data types can be divided into Elementary, Reference and Complex types.

Elementary Types: are fixed or variable length that are not made up of other types.

The difference between variable length data types and fixed length data types is that the length and the memory space required by data objects of variable length data types can change dynamically during runtime, and that these data types cannot be defined irreversibly while the data object is being declared

Control statements

1. Flow Control
2. Logical Expressions
3. Conditional Statements

Flow of Control

1. External Flow: Events triggered by user or the system

Microcomputer Graphics Donald Hearn,M. Pauline Baker,1983 Describes How to Create Flat 3 D Pictures Graphics Animated Cartoons Illustrated BASIC Programs *The Little Book of Service Management* Harry Katzan Jr.,2022-03-09 Service is the up and coming discipline for the 22nd century But exactly what is service Many people think that service is what people do no more no less Nothing can be farther from the truth Then if so why is the service community in constant disarray Startup businesses fail on a regular basis Why They simply do not provide good service Many persons in responsible positions rarely give service even a brief notice What they subconsciously think about service has to be the truth How often do you hear exclamations like I ll never fly again especially on that airline What about I ve had it with fast food restaurants Have you ever heard a student say I ll never take another course from that professor Or it s a great car but the service stinks What about He may be a great doctor but he treats all patients like thy are not human So what do you do if you own or manage a small business and want to start off right That s an easy question You simply send new employees or even experienced ones to service school You ve heard of computer school but have you heard of service school There are books on computer for example all over the place But you probably have never seen one a book that is about service Is an automobile dealership the same as a pharmacy At the service level you can bet they are This book will tell you all you need to know about

providing great service Have you ever heard of a 2 hour seminar on how to give good service I bet you haven t Sometimes a manager will give suggestions but that is about it This book is a service resource Have you experienced a doctor s office that calls a patient concerning what time his or her appointment is Have you had a car dealer tell you they have lost your car Has a doctor operated on the wrong leg Maybe even the wrong person A service is a client provider interaction that creates and captures value for both participants We use service in several aspects of our lives including business government education health care and religion But what exactly are the best practices principles and theories of service The actual study of service is a relatively new field but it is one that can open the door to a better understanding of the essential part of our lives In this little book Harry Katzan Jr founder and editor of the Journal of Service Science offers a concise readable examination of how managers can use information about services to construct a better customer environment Harry Katzan Jr believes that the characteristics of a service process determine its efficacy in solving real world problems He disseminates these characteristics and provides a clear view of service to help managers pinpoint the exact issues they need to tackle With a comprehensive bibliography examples and a highly engaging writing style this little book on service provides is perfect for the professional and laymen alike Discover how you can put information about service to work for you *Applied Concepts in Microcomputer Graphics* Bruce A. Artwick,1985 Applications of microcomputer graphics Display generation basics Working with display generation hardware An introduction to peripheral graphics devices Interactive design elements and intelligence Design and simulation system interaction Mathematics and transforms for advanced graphics High performance graphics and animation Business graphics Foreign and domestic television data Graphics on the Apple II microcomputer Graphics on the IBM personal computer **The Little Book of Artificial Intelligence** Harry Katzan Jr.,2021-11-02 This book is a brief introduction to artificial intelligence It is intended for readers in business education government and self edification The author would like to thank his wife Margaret for helping with the manuscript As in most disciplines some of the subject matter is new and some of the subject matter is not so new especially to persons trained in the subject of computers A person with a degree in computer science should know it already Artificial intelligence is an important subject to the modern world and some disciplines have already benefitted greatly from it The reader can survey the subject matter in any order he or she pleases The busy executive can benefit greatly from it their parent organization Executives in finance and banking can use to understand what is going on in their endeavors Artificial intelligence is not only software but uses specially prepared software to take intellectual benefit in understanding what his or her data systems are doing Artificial intelligence is something for the future from self driving vehicles to self managed business **McGraw-Hill Personal Computer Programming Encyclopedia** William J.
