Microcomputer Software for Management Science and Operations Management Barry Render, 1987-12 Cases and Readings in Management Science Barry Render, Ralph M. Stair, Irwin Greenberg, 1990 Readings in Production and Operations Management Ahmad Ahmadian, Rasoul Afifi, William D. Chandler, 1990 **Production and Operations Management** Howard J. Weiss, Mark E. Gershon, 1989 *Project Management in Manufacturing and High Technology Operations* Adedeji Bodunde Badiru, 1996-06-07 Project management is a system originally developed within the construction industry for controlling schedules costs and specifications of large multitask projects In recent years manufacturers have discovered that project management s time tested techniques dovetail neatly with the current thinking on quality control and management in a highly competitive global marketplace The system has been increasingly recognized for its suitability in the manufacturing process and is now applied in virtually every area of production One of the foremost proponents of this trend is Adedeji Badiru an internationally recognized authority on project management whose books have helped thousands of companies adapt the system to their particular needs This completely revised Second Edition of Badiru s breakthrough publication *Project Management in Manufacturing and High Technology Operations* focuses on the dramatic increase in the use of high tech machinery in industrial operations and seamlessly integrates high tech themes into a general discussion of project management An introductory chapter on manufacturing analysis investigates how the latest concepts and techniques of project management are applied to manufacturing The main body of the book offers a wealth of new material including discussions of learning curve analysis basic models for forecasting and inventory control economic analysis of manufacturing techniques for data analysis and the application of expert systems The chapter on computer applications in project management is completely revised and updated to reflect the enormous strides taken in this area in recent years This book presents an up to date practical approach to project management in manufacturing Written by a pioneer in the application of project management to the manufacturing industries this revised and expanded Second Edition of *Project Management in Manufacturing and High Technology Operations* reflects the increased use of high tech machinery in industrial operations and the trends of recent years to apply project management methods to every phase of production Complete with numerous illustrations as well as exercises to wrap up each chapter this Second Edition features An emphasis on practical examples including many new case studies and a full chapter on the lessons learned from the space shuttle Challenger disaster Many new project management concepts and techniques that focus on manufacturing but can be applied to any project A new chapter on manufacturing systems analysis that provides the backdrop for the project analysis that takes place throughout the book Expanded discussions of the latest quantitative and managerial approaches including learning curve analysis basic models for forecasting and inventory control economic analysis of manufacturing techniques for data analysis and the application of expert systems A strong international perspective useful for multinational companies and for academic

purposes This book equips engineers and managers with the tools to effectively manage all aspects of a project including quality control schedules and expenses Used as a text in engineering or business courses it offers absorbing supplemental reading for students at the upper undergraduate and graduate levels Professor Badiru has been widely praised for his incisive and highly relevant case studies In this Second Edition the case study approach is expanded so that chapters typically include two real world examples of the project management techniques or issues in question In the final chapter Badiru takes a close and painful look at a high tech disaster the explosion of the space shuttle Challenger He offers rare and instructive insight into the devastating failure of a high tech project still poignant despite the passage of time Communicative throughout this volume provides a solid up to date reference for engineers and managers in manufacturing as well as for consultants and administrators in related fields Professor Badiru s proven reputation for providing interesting lecture material also makes Project Management in Manufacturing and High Technology Operations especially useful as a technology management text in both engineering and business schools Cover Design Illustration David Levy

Service Operations Management Robert G. Murdick, Barry Render, Roberta S. Russell, 1990 Human Factors in Management Information Systems Jane M. Carey, 1988 This text is designed to aid understanding of the broad context of human factors in a systems context and also provides guidelines and examples to aid in specific domains This intergrated set of technical and behavioural readings are all directed at the human opportunities and problems associated with the design and implementation of information systems

Project Planning, Scheduling, and Control in Construction Calin M. Popescu, Chotchai Charoenngam, 1995-03-20

Critical Path Method CPM and Performance Evaluation and Review Technique PERT are widely recognized as the most effective methods of keeping large complex construction projects on schedule under budget and up to professional standards But these methods remain underused because they are poorly understood and due to a host of unfamiliar terms and applications may seem more complicated than they really are This encyclopedia brings together in one comprehensive volume all terms definitions and applications related to the time and cost management of construction projects While many of these terms refer to ancient and venerable building practices others have evolved quite recently and refer specifically to modern construction and management techniques Sources include hundreds of professional books trade journals and research publications as well as planning and scheduling software vendor literature The detailed glossary of all applicable terms includes across referenced listing of examples that describe real world applications for each term supplied An extensive bibliography covers all applicable books articles and periodicals available on project planning scheduling and control using CPM and related subjects This book is an important quick reference and desktop information resource for construction planners schedulers and controllers as well as civil engineers and project managers It is also the ultimate research tool for educators students or anyone who seeks to improve their understanding of the management of modern construction projects

Applied Statistics John Neter,1993 **Management Science** Thomas W. Knowles,1989 Interfaces ,1999 Books in Print ,1991 *Decision-Aiding Software* Stuart S. Nagel,1991-06-18 The aim of this book is to clarify what is involved in using decision aiding software in evaluative decision making at a non technical level Topics covered include the skills that software enhances the obstacles that it helps overcome and the applications to diverse fields *TIMS/ORSA Bulletin* Institute of Management Sciences,1992 **Encyclopedia of Production and Manufacturing Management** Paul M. Swamidass,2006-09-21 The Encyclopedia of Production and Manufacturing Management is an encyclopedia that has been developed to serve this field as the fundamental reference work Over the past twenty years the field of production and operations management has grown more rapidly than ever and consequently its boundaries have been stretched in all directions For example in the last two decades production and manufacturing management absorbed in rapid succession several new production management concepts manufacturing strategy focused factory just in time manufacturing concurrent engineering total quality management supply chain management flexible manufacturing systems lean production and mass customization to name a few This explosive growth makes the need for this volume abundantly clear The manufacturing industry thinks and acts more broadly than it did several decades ago The most notable change has been the need for manufacturing managers to think in technological strategic and competitive terms This is a very favorable development and it leads to manufacturing success The entries in this encyclopedia include the most recent technical and strategic innovations in production and manufacturing management The encyclopedia consists of articles of varying lengths The longer articles on important concepts and practices range from five to fifteen pages There are about 100 such articles written by nearly 100 authors from around the world In addition there are over 1000 shorter entries on concepts practices and principles The range of topics and depth of coverage is intended to suit both student and professional audiences The shorter entries provide digests of unfamiliar and complicated subjects Difficult subjects are made intelligible to the reader without oversimplification The strategic and technological perspectives on various topics give this Encyclopedia its distinctiveness and uniqueness The world of manufacturing today is increasingly competitive It is apparent that manufacturers must respond to these competitive pressures with technical and strategic innovation This encyclopedia has been developed to help researchers students and those in the manufacturing industry to understand and implement these ongoing changes in the field **UMTA Abstracts** ,1983-03 **Management Science** ,2004-11 Issues for Feb 1965 Aug 1967 include Bulletin of the Institute of Management Sciences *Solutions manual to accompany an introduction to management science* David Ray Anderson,1994 **Subject Guide to Children's Books in Print 1997** Bowker Editorial Staff,R R Bowker Publishing,1996-09
