The Live Museum Lisa Beisswanger, 2026-03-09 The Live Museum uncovers the surprising history of live performances in US museums during the 1970s exploring how and why both art and museums came alive in this era It reframes this period as a pivotal moment when museums and artists co created new possibilities for art in motion an experiment that continues to shape the museum experience today Drawing on meticulous archival research and in depth case studies this book examines landmark events across a range of institutions by figures such as Merce Cunningham Laurie Anderson Chris Burden and even a cameo by Arnold Schwarzenegger revealing a period of experimental energy as artists and museums negotiated challenged and inspired one another Rejecting the notion that performance art is inherently anti institutional The Live Museum situates these developments within the broader cultural and political landscape including the distribution of performance and public art funding It shows how frictions between artists and museums spurred innovation artists developed new formats and inventive modes of documentation while institutions expanded programming adapted to funding structures and became more dynamic responsive and diverse Iconoclastic yet rigorously historical this book speaks to scholars and students of art history performance studies museum studies and cultural history as well as artists curators and cultural producers

Dennis Oppenheim Dennis Oppenheim, Nevada Museum of Art, 2003 The book illustrates Oppenheim s fascination with the West and Western themes and his approach to the myths of the west Images fixed in popular culture as symbols of rugged individualism or stoic machismo are undermined by a satiric black humor

Although the decades following World War II stand out as an era of rapid growth and construction in the United States those years were equally significant for large scale destruction In order to clear space for new suburban tract housing an ambitious

system of interstate highways and extensive urban renewal development wrecking companies demolished buildings while earthmoving contractors leveled land at an unprecedented pace and scale In this pioneering history Francesca Russello Ammon explores how postwar America came to equate this destruction with progress The bulldozer functioned as both the means and the metaphor for this work As the machine transformed from a wartime weapon into an instrument of postwar planning it helped realize a landscape altering culture of clearance In the hands of the military planners politicians engineers construction workers and even children s book authors the bulldozer became an American icon Yet social and environmental injustices emerged as clearance projects continued unabated This awareness spurred environmental preservationist and citizen participation efforts that have helped to slow though not entirely stop the momentum of the postwar bulldozer

Charting space Elize Mazadiego,2023-10-10 By the late 1960s cartographic formats and spatial information had become a regular feature in many conceptual artworks This volume offers a rich study of conceptualisms mapping practices that includes more expanded forms of spatial representation The book presents twelve in depth case studies that address artists engagement with matters of space at a time when space was garnering new significance in art theory and culture The chapters shed fresh light on an evident spatial turn that took place from the postwar to the contemporary period revealing how it was influenced by larger historical social and cultural contexts In addition to raising questions about conceptualism s relationship to the world the contributors illustrate how artists cartographies served as critical sites for formulating their politics upsetting prevailing systems and graphing new heterogenous spaces

Dennis Oppenheim Dennis Oppenheim,Alanna Heiss,Thomas McEvelley,1992 *Om den amerikanske kunstner* Dennis Oppenheim f dt 1938 *Dennis Oppenheim* Dennis Oppenheim,1990 **X-screen** Matthias Michalka,Museum Moderner Kunst (Austria),2004 For several years now film and video have determined contemporary art and exhibitions on a scale unheard of since the 1960s and 1970s but rarely have these roots themselves been explored X Screen presents a comprehensive historical analysis of expanded forms of filmic projection arranging a complex constellation of films

performances and installations according to three categories First is an exploration of the expansion of the field of projection understood as part of Happenings as well as Fluxus and Pop performances Work by Robert Whitman Carolee Schneemann and USCO is discussed Second is an interrogation of the screen in terms of media analysis anti illusionism or institutional critique in the context of Structural Film and Conceptual art Film installations and multiple projections are especially relevant here including work by Valie Export Michael Snow and Peter Weibel And third is a consideration of post minimalist explorations of the relationship between the media image and physical space as seen in the work of Dan Graham Bruce Nauman Dennis Oppenheim and others *Geographical Explorations of the Fifteenth and Sixteenth Centuries* George Emra Nunn,1915 *Ecologies, Environments, and Energy Systems in Art of the 1960s and 1970s* James Nisbet,2014-02-14 About environmental art and ecological aspects of art in the 1960s and 1970s *Mining Manual* ,1906 **Into the Light** Chrissie Iles,Whitney Museum of American Art,2001 Since that time the projected image has become a prominent feature of contemporary art making and the incorporation of large scale moving images by artists into installations now has a rich history But due to the ephemeral nature of the original art works many classic installations while remembered have not been widely seen *Explorations in Entrepreneurial History* ,1964 **Bulletin of the Mineral Research and Exploration Institute of Turkey** Maden Tetkik ve Arama Enstitüsü (Turkey),1992
