Mind Of The Universe Understanding Science And Religion:

The Mind of the Universe Mariano Artigas,2000 The Mind of the Universe written by a philosopher and physicist provides a study in which a competent presentation of physical discoveries is combined with a rational search for philosophical presuppositions of science An important contribution to the dialogue between religion and science it will inspire new attempts at bridging science and philosophy in their common search for the hidden meaning of the new scientific theories

Science and Faith within Reason Jaume Navarro,2016-04-01 Scientists historians philosophers and theologians often engage in debates on the limitations and mutual interactions of their respective fields of study Serious discussions are often overshadowed by the mass produced popular and semi popular literature on science and religion as well as by the political agendas of many of the actors in these debates For some reducing religion and science to forms of social discourse is a possible way out from epistemological overlapping between them yet is there room for religious faith only when science dissolves into one form of social discourse The religion thus rescued would have neither rational legitimisation nor metaphysical validity but if both scientific and religious theories try to make absolute claims on all possible aspects of reality then conflict between them seems almost inevitable In this book leading authors in the field of science and religion including William Carroll Steve Fuller Karl Giberson and Roger Trigg highlight the oft neglected and profound philosophical foundations that underlie some of the most frequent questions at the boundary between science and religion the reality of knowledge and the notions of creation life and design In tune with Mariano Artigas s work the authors emphasise that these are neither religious nor scientific but serious philosophical questions

The Bible and Science Vincent Smiles,2011-06-01 Confusing paradox surrounds the Bible Some look to it as the definition of reality and deny science others see science alone as the arbiter of truth and deny the Bible Both extremes are merely symptoms of a still wider debate on the place of ancient spiritual wisdom in a science dominated world Following the Reformation and Enlightenment the Western world gained great power but lost its spiritual bearings This book draws on numerous sources ancient and modern to examine what the missteps were that have brought us to a point of such confusion and in doing so argues cogently against the modern philosophy of scientific materialism With the aid of biblical stories and imagery it suggests how we might find our way back to balance where ancient wisdom and modern science can together shed light on humans and their encompassing reality Vincent Smiles is professor of theology at Saint John s University Collegeville Minnesota

The Role of Theology in the History and Philosophy of Science Joshua M. Moritz,2017-11-13 After a bibliographic introduction highlighting various research trends in science and religion Joshua Moritz explores how the current academic and conceptual landscape of theology and science has been shaped by the history of science even as theology has informed the philosophical foundations of science The first part assesses the historical interactions of science and the Christian faith looking at the cases of human dissection in the Middle Ages and the Galileo affair in order to challenge the common notion that science and religion have always been at war Part

two investigates the nature of the interaction between science and Christian theology by exploring the role that metaphysical presuppositions and theological concepts have played and continue to play within the scientific process **Issues in**

Science and Theology: What is Life? Dirk Evers, Michael Fuller, Antje Jackelén, Knut-Willy Sæther, 2015-06-03 This book explores the concept of Life from a range of perspectives Divided into three parts it first examines the concept of Life from physics to biology It then presents insights on the concept from the perspectives of philosophy theology and ethics The book concludes with chapters on the hermeneutics of Life and pays special attention to the Biosemiotics approach to the concept The question What is Life has been deliberated by the greatest minds throughout human history Life as we know it is not a substance or fundamental property but a complex process It is not an easy task to develop an unequivocal approach towards Life combining scientific semiotic philosophical theological and ethical perspectives In its combination of these perspectives and its wide ranging scope this book opens up levels and identifies issues which can serve as intersections for meaningful interdisciplinary discussions of Life in its different aspects The book includes the four plenary lectures and selected revised and extended papers from workshops of the 14th European Conference on Science and Theology ECST XIV held in Tartu Estonia April 2012 **Faith, Scholarship, and Culture in the 21st Century** Alice Ramos, Marie I. George, 2002

While some intellectuals at the end of the nineteenth century argued that scientific progress would eventually cause the demise of religion it is evident that this has not been the case and that contemporary science is in fact not necessarily inimical to a religious worldview So a fruitful dialogue between science and religion has become a reality But there is also a more fundamental question that arises which is not simply the relationship of the sciences or of other disciplines to religion but rather whether faith can and should have an impact on teaching and research The majority of the essays in this volume hold that the Christian faith provides definite cognitive advantages and that to leave one's faith at the entrance of the campus thus separating faith from reason leads to a schizophrenic view of the Christian's intellectual life This volume thus shows how the religious faith of intellectuals not all of whom are Christian exercises a real influence on their scholarship In consonance with the thought of Pope John Paul II it is the contention of the scholars whose essays make up this volume that a faith that imbues research and teaching will effect a transformation not only in themselves but also in their students and eventually in society Hence a faith that is fully received thought out and lived will penetrate culture and there is no doubt that present day culture stands in need of transformation In fact the encyclical Fides et Ratio from which a number of the essays draw inspiration attributes the secularization of the West in great part to the separation of faith from culture Jacques Maritain himself more than fifty years ago recognized that modern and contemporary culture had severed its ties with the sacred and in so doing had turned its back on humanity Now in the twenty first century as always human beings have a profound need for meaning and transcendence a need which scholarly reflection such as that found in this volume can help to satisfy In addition to the editors the contributors are David Arias Jr Mariano Artigas Gavin T Colvert John Goyette Frederick Erb III
