New Dialectics and Political Economy, 2002 Many of the leading thinkers on dialectics in the Marxian tradition have collaborated here to put forward and debate challenging new perspectives on the nature and importance of dialectics The issues dealt with range from the philosophical consideration of the precise nature of dialectical reasoning to dialectics and economic theory and to more concrete concerns such as how dialectics can help us think about globalization freedom inflation and subjectivity

Capitalism and the Dialectic John Bell, 2009-10-15 An introduction and exposition to the Uno approach of Marx's work

Dialectics and Deconstruction in Political Economy R. Albritton, 1999-06-08 Robert Albritton offers the most authoritative reassessment of Marxist political economy since Althusser Original reinterpretations of thinkers including Hegel Weber Althusser Derrida and Adorno cast new light on heated battles between Hegelian dialectics and deconstructivist criticism The book makes accessible the sometimes daunting thought associated with both dialectics and deconstruction drawing upon insights from philosophy sociology political science and critical theory Finding a non essentialist way of using the immense cognitive power of dialectics accepting a limited deconstruction but challenging further deconstructionist directions represents a major breakthrough for political economy

Hegel's Dialectical Political Economy Paul Diesing, 2019-03-01 This book demonstrates how Hegel's dialectic can be used in empirical research and shows how one can do dialectical research in economics It also shows how one can use dialectical thinking to interpret some personal or social or political problem and devise a possible solution

The New Dialectic and Marx's Capital Chris Arthur, 2021-08-04 This book argues that the dialectic of Marx's Capital has a systematic rather than historical character It sheds new light on Marx's great work while going beyond it in many respects

Political Economy and Global Capitalism Robert Albritton, Bob Jessop, Richard Westra, 2010 This volume brings together original and timely writings by internationally renowned scholars that reflect on the current trajectories of global capitalism and in the light of these consider likely possible or desirable futures It offers theory informed writing that contextualizes empirical research on current world historic events and trends with an eye towards realizing a future of human social and economic betterment

From Political Economy to Economics Dimitris Milonakis, Ben Fine, 2009-01-13 Economics has become a monolithic science variously described as formalistic and autistic with neoclassical orthodoxy reigning supreme So argue Dimitris Milonakis and Ben Fine in this new major work of critical recollection The authors show how economics was once rich diverse multidimensional and pluralistic and unravel the

processes that lead to orthodoxy's current predicament. The book details how political economy became economics through the desocialisation and the dehistoricisation of the dismal science accompanied by the separation of economics from the other social sciences especially economic history and sociology. It is argued that recent attempts from within economics to address the social and the historical have failed to acknowledge long standing debates amongst economists, historians and other social scientists. This has resulted in an impoverished historical and social content within mainstream economics. The book ranges over the shifting role of the historical and the social in economic theory, the shifting boundaries between the economic and the non economic all within a methodological context. Schools of thought and individuals that have been neglected or marginalised are treated in full including classical political economy and Marx, the German and British historical schools, American institutionalism, Weber and Schumpeter and their programme of Social Konomik and the Austrian school. At the same time developments within the mainstream tradition from marginalism through Marshall and Keynes to general equilibrium theory are also scrutinised and the clashes between the various camps from the famous Methodenstreit to the fierce debates of the 1930s and beyond brought to the fore. The prime rationale underpinning this account drawn from the past is to put the case for political economy back on the agenda. This is done by treating economics as a social science once again rather than as a positive science as has been the inclination since the time of Jevons and Walras. It involves transcending the boundaries of the social sciences but in a particular way that is in exactly the opposite direction now being taken by economics imperialism. Drawing on the rich traditions of the past, the reintroduction and full incorporation of the social and the historical into the main corpus of political economy will be possible in the future.

Economics

Transformed Robert Albritton, 2007-05-20. Is Marx relevant? Bringing to life the classic concepts in Marx's economic thought. Robert Albritton shows that he offers great potential for study. Deeply critical of the way economics is taught and studied today, this is a textbook that will appeal to anyone who wants a forward thinking approach to the discipline that's free from the constraints of neo-classical orthodoxy. Taking up key aspects of Marx's work including surplus value theory, dialectical reasoning and the commodity form, Albritton highlights their relevance in the modern world and explains why mainstream economics has been so blind to their revolutionary potential. Written with style and clarity, it is perfect for economics undergraduates.

The New Dialectic and Marx's Capital Christopher John Arthur, 2004. This book argues that the dialectic of Marx's Capital has a systematic rather than historical character. It sheds new light on Marx's great work while going beyond it in many respects.

Frontiers of Political Economy Guglielmo Carchedi, 1991. Transcending the arid formalism of present day economic theory, Frontiers of Political Economy develops a new and accessible perspective on the world economy. Guglielmo Carchedi identifies and analyses three key features of modern capitalism: the rapidly increasing share of human labour needed for the advancement of science and technology rather than for the production of goods, the global rather than national nature of production, distribution and consumption, and the dominance of the oligopolies. This analysis

enables Carchedi to explore new theoretical frontiers from an original theory of mental and material labour to an investigation of the conditions under which mental labour produces value from an assessment of the class structure of modern capitalism to an appraisal of the social content of science and technology from an alternative account of crises inflation and stagflation to a study of their relation to the destruction of value and to arms production He also cast fresh light on a number of basic contemporary issues including the present financial and monetary crisis and surveys the most important recent controversies in language accessible to non specialists Rigorous and wide ranging but written with great lucidity *Frontiers of Political Economy* is an essential book for both specialists and students in economics and politics

Dialectics of Class Struggle in the Global Economy Clark Everling,2009-12-04 This book restores social production and classes back at the centre of Marxist theory by providing what E V Ilyenkov calls the development of a fully logical and really historical dialectical examination of human social production

Adorno and Marx Werner Bonefeld,Chris O’Kane,2022-06-02 While Adorno has tended to be read as a critic of the administered world and the consumer industry rather than a Marxist Adorno and Marx establishes Adorno s negative dialectics as fundamental for understanding Marx s critique of political economy This conception of the critique of political economy as a critical theory marks both a radical departure from traditional Marxist scholarship and from traditional readings of Adorno s work and warns against identifying Adorno with Marx or Marx with Adorno Rather it highlights the intersection between Adorno s critical theory and Marx s critique of political economy that produces a critical theory of economic objectivity that moves beyond Marxian economics and Adornian social theory Adorno and Marx offers an ingenious account of critical social theory Its subversion of the economic categories of political economy contributes to the cutting edge of contemporary social theory and its critique of social practice

Knowledge and Class Stephen A. Resnick,Richard D. Wolff,1989-07-15 **The Journal of Political Economy** ,1915 **Papers Relating to Political Economy** Francis Ysidro Edgeworth,1925 [Marx's Scientific Dialectics](#)

Paul Paolucci,2007 This book examines both problems in traditional readings of Marx s texts and how he used several methods of science to inform his dialectical thinking historical materialist research political economic analyses and his communist project A case is made for Marx s continuing methodological relevance

Capitalism and the Dialectic John R. Bell,2009-09-07 From the 1960s to the 1990s the ground breaking Japanese economists Kozo Uno and Thomas Sekine developed a masterful reconfiguration of Marxist economics The most well known aspect of which is the levels of analysis approach to the study of capitalism Written in Japanese the Uno Sekine approach to Marx s work is little understood in West John Bell seeks to correct this explaining how problematic elements of Marxian Political Economy such as the law of value and the law of relative surplus population can be solved by using a more rigorous dialectical analysis Bell s clear and accessible synthesis provides economists with the tools to interrogate capitalism in a more powerful way than ever before

An Introduction to the Study of Political Economy Luigi Cossa,1893 *Cyclopædia of Political Science, Political*

Economy, and of the Political History of the United States, by the Best American and European Writers John Joseph Lalor, 1899
