New Golden Land:

The New Golden Land Hugh Honour, 1976 Smoothing the Ground Brian Swann, 1983 A compilation of essays and translations in which leading scholars in the fields of linguistics folklore ethnopoetics and literary criticism discuss the continuing American Indian oral tradition as literature Native Americans invested the spoken word with reverence and power and the oral literature that resulted from the fusing of language and event into vital force is extraordinarily rich and potent Authors such as Dell Hymes Karl Kroeber Dennis Tedlock Jarold Ramsey and John Bierhorst address the many aspects of the study of this literature from the problem of translation and of the role of the literary critic to the interpretation of specific stories ISBN 0 520 04902 0 12 95 *Energy, Governance and Security in Thailand and Myanmar (Burma)* Adam Simpson, 2016-04-29 Across the world states are seeking out new and secure supplies of energy but this search is manifesting itself most visibly in Asia where rapid industrialisation in states such as China and India is fomenting a frantic scramble for energy resources Due to entrenched societal inequities and widespread authoritarian governance however the pursuit of national energy security through transnational energy projects has resulted in devastating impacts on the human and environmental security of local populations These effects are particularly evident in both Thailand and Myanmar Burma which located at the crossroads of Asia are increasingly engaged in the cross border energy trade Based on extensive fieldwork and theoretical analysis this ground breaking book proposes a new critical approach to energy and environmental security and explores the important role that both local and transnational environmental movements are playing in the absence of effective and democratic governments in providing activist environmental governance for energy projects throughout the region By comparing the nature of this activism under two very different political regimes it delivers crucial theoretical insights with both academic and policy implications for the sustainable and equitable development of the South s natural resources **American Foreign Policy and the Utopian Imagination** Susan M. Matarese, 2010-03-02 With the collapse of the Soviet Union and the end of the Cold War American decision makers have been forced to confront anew questions about the role of the United States in world affairs What are the responsibilities of the United States toward other countries What are the appropriate uses and limitation of American power And what from an American point of view would be the ideal shape of the imagined New World Order However U S policymakers may resolve such issues their thinking will be influenced by assumptions deeply embedded in American culture Some of those beliefs derive from the nation s distinctive history geography and resources But others are rooted in what Susan M Matarese calls the national image a set of emotionally charged relatively coherent ideas about the special qualities of the United States and its place in the world Building on a long tradition of scholarship that looks to works of literature for insights into national myths and symbols Matarese examines a rich trove of utopian fiction written by Americans during the late nineteenth century Such writings she shows provide a useful window into the popular imagination revealing widely shared notions about the foreign policy of an

idealized America notions that have proven remarkably resilient in the twentieth century as well. Indeed even in the post Cold War era one can find striking similarities between the foreign policy goals of the Bush and Clinton administrations and the dreams of America's utopian architects a century earlier. The author concludes with an appeal for greater humility and realism in the formation of U.S. foreign policy and a recognition of the limits of American power in what is likely to be an increasingly fluid, fragmented and multipolar world. **The New Golden Land Anthology** Judith Elkin, 1983

The Roots of Environmental Consciousness Stephen Hussey, Paul Thompson, 2002-09-11 This book examines the roots of contemporary environmental consciousness and action in terms of both popular experience and tradition. A wide range of geographical and thematic case studies explore the myth, tradition and collective memory that shape our environmental thought. Containing a wealth of empirical source material, this book will be invaluable for sociologists and historians alike. **Bulletin** Nottingham (England). Public Libraries, 1910

Rivers of Gold Hugh Thomas, 2013-11-20 From one of the greatest historians of the Spanish world, here is a fresh and fascinating account of Spain's early conquests in the Americas. Hugh Thomas's magisterial narrative of Spain in the New World has all the characteristics of great historical literature: amazing discoveries, ambition, greed, religious fanaticism, court intrigue and a battle for the soul of humankind. Hugh Thomas shows Spain at the dawn of the sixteenth century as a world power on the brink of greatness. Her monarchs, Fernando and Isabel, had retaken Granada from Islam, thereby completing restoration of the entire Iberian peninsula to Catholic rule. Flush with success, they agreed to sponsor an obscure Genoese sailor's plan to sail west to the Indies, where legend purported gold and spices flowed as if they were rivers. For Spain and for the world, this decision to send Christopher Columbus west was epochal: the dividing line between the medieval and the modern. Spain's colonial adventures began inauspiciously: Columbus's meagerly funded expedition cost less than a Spanish princess's recent wedding. In spite of its small scale, it was a mission of astounding scope: to claim for Spain all the wealth of the Indies. The gold alone, thought Columbus, would fund a grand Crusade to reunite Christendom with its holy city, Jerusalem. The lofty aspirations of the first explorers died hard as the pursuit of wealth and glory competed with the pursuit of pious impulses. The adventurers from Spain were also, of course, curious about geographical mysteries and they had a remarkable loyalty to their country. But rather than bridging earth and heaven, Spain's many conquests bore a bitter fruit. In their search for gold, Spaniards enslaved Indians from the Bahamas and the South American mainland. The eloquent protests of Bartolom de las Casas, here much discussed, began almost immediately. Columbus and other Spanish explorers, Cortes, Ponce de Leon and Magellan among them, created an empire for Spain of unsurpassed size and scope. But the door was soon open for other powers, enemies of Spain, to stake their claims. Great men and women dominate these pages: cardinals and bishops, priors and sailors, landowners and warriors, princes and priests, noblemen and their determined wives. **Rivers of Gold** is a great story, brilliantly told. More significant, it is an engrossing history with many profound, often disturbing, echoes in the present. **The New Golden Land Anthology** Judith Elkin, 1983
