New Life For The College Curriculum:

New Life for the College Curriculum Jerry G. Shaping the College Curriculum Lisa R. Lattuca, Joan S. Stark, 2011-01-11 Shaping the College Curriculum focuses on curriculum development as an important decision making process in colleges and universities The authors define curriculum as an academic plan developed in a historical social and political context They identify eight curricular elements that are addressed intentionally or unintentionally in developing all college courses and programs By exploring the interaction of these elements in context they use the academic plan model to clarify the processes of course and program planning enabling instructors and administrators to ask crucial questions about improving teaching and optimizing student learning This revised edition continues to stress research based educational practices The new edition consolidates and focuses discussion of institutional and sociocultural factors that influence curricular decisions All chapters have been updated with recent research findings relevant to curriculum leadership accreditation assessment and the influence of academic fields while two new chapters focus directly on learning research and its implications for instructional practice A new chapter drawn from research on organizational change provides practical guidance to assist faculty members and administrators who are engaged in extensive program improvements Streamlined yet still comprehensive and detailed this revised volume will continue to serve as an invaluable resource for individuals and groups whose work includes planning designing delivering evaluating and studying curricula in higher education This is an extraordinary book that offers not a particular curriculum or structure but a comprehensive approach for thinking about the curriculum ensuring that important considerations are not overlooked in its revision or development and increasing the likelihood that students will learn and develop in ways institutions hope they will The book brings coherence and intention to what is typically an unstructured haphazard and only partially rational process guided more by beliefs than by empirically grounded substantive information Lattuca and Stark present their material in ways that are accessible and applicable across planning levels course program department and institution local settings and academic disciplines It's an admirable and informative marriage of scholarship and practice and an insightful guide to both Anyone who cares seriously about how we can make our colleges and universities more educationally effective should read this book Patrick T Terenzini distinguished professor and senior scientist Center for the Study of Higher Education The Pennsylvania State University

New Life for Historically Black Colleges and Universities Vann R. Newkirk, 2014-01-10 In December 2008 Georgia state senator Seth Harp ignited controversy when he proposed merging two historically Black colleges with nearby predominantly white colleges to save money Less than a year later Mississippi governor Haley Barbour sought to unite Mississippi's three predominantly Black

Chan, Jens Zinn, Lih-Rong Wang, 2015-10-30 Social policy in modern industrialised societies is increasingly challenged by new social risks These include insecure employment resulting from ever more volatile labour markets new family and gender relationships resulting from the growing participation of women in the labour market and the many problems resulting from very much longer human life expectancy Whereas once social policy had to be in step with a standardised relatively stable and predictable life course it now has to cope with non standardised individual preferences life courses and families and the consequent increased risks and uncertainties This book examines these new life courses and their impact on social policy across a range of East Asian societies It shows how governments and social welfare institutions have been slow to respond to the new challenges In response we propose a life course sensitised policy as an approach to manage these risks Overall the book provides many
