

Reason & Morality

- Only reason, not history, can guide us in determining what morality is
 - We must even judge Jesus by our rationally-determined standards before we praise him
 - Reason leads us from popular philosophy to philosophical judgment to metaphysics, the laws of morality
 - “Everything in nature works according to laws. Only a rational being has the power to act according to his conception of laws, i.e., according to principles, and thereby he has a will.” (§ 409-412)
- “The proper and inestimable worth of an absolutely good will consists precisely in the fact that the principle of action is free of all influences from contingent grounds, which only experience can furnish.” (§ 426)
 - Reason exists *a priori*, apart from experience and from history
 - True virtue is stripped of sensuality, reward, and self-love (fn. 19)

Reason and Morality Alan Gewirth,1978 Most modern philosophers attempt to solve the problem of morality from within the epistemological assumptions that define the dominant cultural perspective of our age Alan Gewirth's Reason and Morality is a major work in this ongoing enterprise Gewirth develops with patience and skill what he calls a modified naturalism in which morality is derived by logic alone from the concept of action I think that the publication of Reason and Morality is a major event in the history of moral philosophy It develops with great power a new and exciting position in ethical naturalism No one regardless of philosophical stance can read this work without an enlargement of mind It illuminates morality and agency for all E M Adams The Review of Metaphysics This is a fascinating study of an apparently intractable problem Gewirth has provided plenty of material for further discussion and his theory deserves serious consideration He is always aware of possible rejoinders and argues in a rigorous manner showing a firm grasp of the current state of moral and political philosophy Mind
