Rebuilding the Royal Navy David K. Brown, George Moore, 2003 An authoritative design history of postwar British warship development based on both declassified documentation and personal experience In this fourth and final volume in his bestselling series on Royal Navy warship development David K Brown tackles the period in which he himself worked as a Naval Constructor However for this book his personal knowledge and experience is augmented by George Moore s in depth archival research on the substantial body of material declassified in recent years Although the fleet was enormous in 1945 much was old and worn out while Britain faced economic austerity and a reduced world role At the same time new threats and novel technologies rendered even the newer ships obsolescent How British designers responded to these unprecedented challenges is one of the central themes of the book After considering the wartime legacy the book moves on to cover some of the ambitious ideas for replacement or conversion of the bigger ships most of which were stifled by lack of funds But most of the book is devoted to new construction with chapters on all the major categories from aircraft carriers through destroyers and frigates to submarines including nuclear and strategic minesweepers and small craft Each contains new information on unbuilt designs and identifies many innovations and analyses the impact of the Falklands War David K Brown had an eminent career as a warship designer with the Royal Corps of naval Constructors He has published widely on historical and professional topics and his books include Warrior to Dreadnought The Grand Fleet and Nelson To Vanguard George Moore devotes his time to naval research and has completed a major study of wartime naval building programmes SELLING POINTS Last volume of a successful and highly praised series that began with From Warrior to Dreadnought The only design history of modern British warships with inside information and insight New drawings of never before seen abortive designs

ModelingMadness Com The ShipCraft series provides in depth information about building and modifying model kits of popular warship types Lavishly illustrated each book takes the modeller through a brief history of the subject highlighting differences between ships and changes in their appearance over their careers This includes paint schemes and camouflage featuring color profiles and highly detailed line drawings and scale plans The modelling section reviews the strengths and weaknesses of available kits lists commercial accessory sets for super detailing of the subjects and provides hints on modifying and improving the basic kit This is followed by an extensive photographic gallery of selected high quality models in a variety of scales and the book concludes with a section on research references books monographs large scale plans and relevant websites

The subject of this volume is the evolution of the Royal Navy s fleet carriers as exemplified by those designed from the keel up for the role Hermes was the world s first purpose built carrier laid down in 1918 but she was followed by a series of conversions from other types and it was not until the mid 1930s that another was designed and built from scratch This was the famous Ark Royal a far larger and more capable ship but destined to be a one off as the Navy switched its focus to a ship capable of surviving in the most hostile environments This requirement produced the radically different armored carriers of the Illustrious class arguably the toughest aviation ships of the Second World War With its unparalleled level of visual information paint schemes models line drawings and photographs this book is simply the best reference for any modelmaker setting out to build one of these challenging subjects

British Submarines in the Cold War Era Norman Friedman,2020-09-30 The first comprehensive technical history on the subject with photos A must read for all professionals designers and scholars of modern submarines Australian Naval Institute

The Royal Navy s greatest contribution to the Allied success in World War II was undoubtedly the defeat of the U boat menace in the North Atlantic a victory on which all other European campaigns depended The underwater threat was the most serious naval challenge of the war so it was not surprising that captured German submarine technology became the focus of attention for the British submarine service after 1945 It was quick to test and adopt the schnorkel streamlining homing torpedoes and less successfully hydrogen peroxide propulsion Furthermore in the course of the long Atlantic battle the Royal Navy had become the world s most effective anti submarine force and was able to utilize this expertise to improve the efficiency of its own submarines However in 1945 German submarine technology had also fallen into the hands of the Soviet Union and as the Cold War developed it became clear that a growing Russian submarine fleet would pose a new threat Britain had to go to the US for its first nuclear propulsion technology but the Royal Navy introduced the silencing technique that made British and US nuclear submarines

viable anti submarine assets and it pioneered in the use of passive silent sonars in that role Nuclear power also changed the role of some British submarines which replaced bombers as the core element of British Cold War and post Cold War nuclear deterrence As in other books in this series this one shows how a combination of evolving strategic and tactical requirements and new technology produced successive types of submarines It is based largely on unpublished and previously classified official documentation and to the extent allowed by security restrictions also tells the operational story HMS Conqueror is still the only nuclear submarine to have sunk a warship in combat but there are many lesser known aspects of British submarine operations in the postwar era *Journal of the Royal United Service Institution* Royal United Services Institute for Defence Studies,1924 *Country Life* ,1915 **Naval History** ,2005 **Ten Years at Pemaquid** John Henry Cartland,1899 **The Mariner's Mirror** Leonard George Carr Laughton,Roger Charles Anderson,William Gordon Perrin,1923 *The United Service* ,1882 **British Warships in the Age of Sail, 1714-1792** Rif Winfield,2007-12-12 The 2nd volume in this comprehensive naval history details the design and employment of British warships through the 18th century The Hanoverian dynasty that came to power with the accession of George I in 1714 inherited the largest navy in the world In the course of the century this force would see a vast amount of action against nearly every major navy reaching a pinnacle of success in the Seven Years War only to taste defeat in the American Revolution This superb reference book outlines the service history of every ship that fought for the Royal Navy in the great wars of the eighteenth century well over 2000 vessels The book is organized by Rate classification and class The technical and building data of each ship is followed by a concise summary of its career This includes commissioning dates refit periods changes of captain the stations where they served and details of any noteworthy actions in which they took part It will enable anyone to follow up a casual reference to any warship and will provide the researcher with a solid core of information on which to base further study With its unique depth of information this is a work of the utmost importance to every naval historian and general reader interested in the navy of the sailing era **The Life and Adventures of Robinson Crusoe** Daniel Defoe,1882 *First Rate* Rif Winfield,2010-10-01 In the sailing era the warships called First Rates were the largest most powerful and most costly ships to construct maintain and operate Built to the highest standards they were lavishly decorated and given carefully considered names that reflected the pride and prestige of their country They were the very embodiment of national power and as such drew the attention of artists engravers and printmakers In this first history of the major ships in the Royal Navy during the Age of Sail virtually every British First Rate from the Prince Royal of 1610 to the end of sail is represented by an array of paintings drawings models or plans This spectacular collection of illustrations many in full color is a celebration of these magnificent ships combining an authoritative history of their development with reproductions of many of the best images of the ships chosen for their accuracy detail and sheer visual power in an extra large format that does full justice to the images themselves It also includes comparative data on similar vessels in other navies so it is a book that all with an interest in

Allies against the Rising Sun Nicholas Evan Sarantakes,2009-10-27

In the annals of World War II the role of America s British allies in the Pacific Theater has been largely ignored Nicholas Sarantakes now revisits this seldom studied chapter to depict the delicate dance among uneasy partners in their fight against Japan offering the most detailed assessment ever published of the U S alliance with Great Britain Australia New Zealand and Canada Sarantakes examines Britain s motivations for participating in the invasion of Japan the roles envisioned by its Commonwealth nations and the United States decision to accept their participation He shows how the interests of all allies were served by maintaining the coalition even in the face of disputes between nations between civilian and military leaders and between individual services and that allied participation despite its diplomatic importance limited the efficiency of final operations against Japan Sarantakes describes how Churchill favored British led operations to revive the colonial empire while his generals argued that Britain would be further marginalized if it didn t fight alongside the United States in the assault on Japan s home islands Meanwhile Commonwealth partners preoccupied with their own security concerns saw an opportunity to support the mother country in service of their own separatist ambitions And even though the United States called the shots it welcomed allies to share the predicted casualties of an invasion Sarantakes takes readers into the halls of both civil and military power in all five nations to show how policies and actions were debated contested and resolved He not only describes the participation of major heads of state but also brings in lesser known Commonwealth figures plus a cast of military leaders including General of the Army Douglas MacArthur and Fleet Admiral Chester Nimitz on the American side and Admiral of the Fleet Sir Andrew Cunningham and Field Marshal Sir Alan Brooke on the British He also paints vivid scenes of battle including the attack of the British Pacific Fleet on Japan and ground fighting on Okinawa Deftly blending diplomatic political and military history encompassing naval air and land forces Sarantakes s work reveals behind the scenes political factors in warfare alliances and explains why the Anglo America coalition survived World War II when it had collapsed after World War I
