Ancient Logic and Its Modern Interpretations J. Corcoran, 2012-12-06 During the last half century there has been revolutionary progress in logic and in logic related areas such as linguistics. Historical knowledge of the origins of these subjects has also increased significantly. Thus it would seem that the problem of determining the extent to which ancient logical and linguistic theories admit of accurate interpretation in modern terms is now ripe for investigation. The purpose of the symposium was to gather logicians, philosophers, linguists, mathematicians, and philologists to present research results bearing on the above problem with emphasis on logic. Presentations and discussions at the symposium focused themselves into five areas: ancient semantics, modern research in ancient logic, Aristotle's logic, Stoic logic, and directions for future research in ancient logic and logic related areas. Seven of the papers which appear below were originally presented at the symposium. In every case discussion at the symposium led to revisions; in some cases to extensive revisions. The editor suggested still further revisions but in every case the author was the final judge of the work that appears under his name.

Models of the History of Philosophy Giovanni Santinello, Gregorio Piaia, 2010-12-01 This volume is the translation of *Dall et cartesiana a Brucker*, the second volume of the multi-volume work *Storia delle storie generali della filosofia*. It guides the reader from the Cartesian rejection of the philosophical past that found voice in the work of Malebranche to the establishment of a critical history of philosophy by 18th century thinkers A. F. Boureau, Deslandes, and J. J. Brucker. The latter pair investigated philosophy from its most ancient origins up to the contemporary age and oversaw the transformation of the history of philosophy into a genre in its own right, thus spawning dozens of works that made a major contribution to the culture of the Enlightenment. Through careful analysis of more than 36 separate works, the authors show how in the span of a single century the theoretical and methodological techniques used to assess the history of philosophy were refined and developed.

Hon. Professor F. Max Müller ... First Series Friedrich Max Müller, 1901 **A Philosopher at the Crossroads** Amos Edelheit, 2022-03-16 This study explains how one of the most remarkable thinkers of the Italian Renaissance, Giovanni Pico della Mirandola (1463-1494), broke new ground by engaging with the scholastic tradition while maintaining his humanist sensibilities. A central claim of the monograph is that Pico was a philosopher at the crossroads whose sophisticated reading of numerous scholastic thinkers enabled him to advance a different conception of philosophy. The scholastic background to Pico's work has been neglected by historians of the period. This omission has served to create not only an unreliable picture of Pico's thought but also a more general ignorance of the dynamism of scholastic thought in late fifteenth century Italy. The author argues that these deficiencies of modern scholarship stand in need of correction. The Formation of
