Reception Of Unconventional Science By The Scientific Community:

The Reception Of Unconventional Science Seymore H Mauskopf,2019-06-26 The issue of perhaps greatest concern to historians of science today is the internalist externalist dichotomy This volume directly addresses that issue at the same time providing a context for the serious study of heterodox science and scientific theories The book consists of four studies each of which considers the response of a scientific community to an unconventional theory or claim the acausal physics of Heisenberg Wegener s geological theory of continental drift acupuncture and the statistical argument for extrasensory perception As they reveal a wide range of reactions to orthodoxy the studies themselves exemplify the range of approaches the historian may use in examining scientific unconventionality

The Politics and Morality of Deviance Nachman Ben-Yehuda,1990-01-01 The Politics and Morality of Deviance develops a theoretical framework and then applies it to four different and specific case studies in an explicit attempt to put the sociology of deviance back into mainstream sociology It argues that deviance should be analyzed as a relative phenomenon in different and changing cultures vis a vis change and stability in the boundaries of different symbolic moral universes It also argues that the legitimization of power should be thought of in terms of a moral order that in turn defines the societal boundaries of different symbolic moral universes Mills concept of motivational accounting systems is utilized throughout the text in order to illustrate how the micro and macro levels of analysis can be integrated

The Elusive Science Seymour H. Mauskopf, Michael Rogers McVaugh, 1980 Publisher description In the tradition of Margaret MacMillan's Paris 1919 comes a new consideration of Canada's most famous war and the Treaty of Ghent that unsatisfactorily concluded it from one of this country's premier military historians In the Canadian imagination the War of 1812 looms large It was a war in which British and Indian troops prevailed in almost all of the battles in which the Americans were unable to hold any of the land they fought for in which a young woman named Laura Secord raced over the Niagara peninsula to warn of American plans for attack though how she knew has never been discovered and in which Canadian troops burned down the White House Competing American claims insist to this day that in fact it was they who were triumphant But where does the truth lie Somewhere in the middle as is revealed in this major new reconsideration from one of Canada's master historians Drawing on never before seen archival material Zuehlke paints a vibrant picture of the war's major battles vividly re-creating life in the trenches the horrifying day to day manoeuvring on land and sea and the dramatic negotiations in the Flemish city of Ghent that brought the war to an unsatisfactory end for both sides By focusing on the fraught dispute in which British and American diplomats quarrelled as much amongst themselves as with their adversaries Zuehlke conjures the compromises and backroom deals that yielded conventions resonating in relations between the United States and Canada to this very day

The History of Science Gordon L. Miller, 1992 Reflects the varied interests and approaches of historians of science in the twentieth century primarily since 1950 The annotations are clear succinct and helpful the book's organization is straightforward sensible and supplemented by cross references fills a needed gap in reference sources for the history of science and medicine ISIS
