Special Educational Needs in the Primary School Jean Gross, 2002 Reviews of the first two editions extraordinarily rich in ideas an essential buy TES an excellent clearly written work which is full of practical advice and presented in an easily readable manner This book is a highly recommended read Do buy it and see Support for Learning has proved especially influential at practitioner level never failing to offer a balanced assessment British Journal of Special Education I have a comprehensive library of books on special educational needs but I use this one more than any other because I find it readable practical and accessible It is a useful and informative book both to read cover to cover and to dip into Although it is based on sound theoretical knowledge it is clear that Jean Gross is writing from her own experience as a teacher and SEN practitioner TES Recent legislation and cutbacks to central support services mean that the responsibility for meeting special educational needs is resting ever more squarely on the shoulders of ordinary classroom teachers Yet few feel wholly confident in their ability to adapt work within the national curriculum to meet the whole range of needs or coordinate successful individual education plans for children who for whatever reason are not learning as well as they might This book will increase that confidence Aimed at busy class teachers special needs coordinators heads and teachers in training it shows how the teacher can build differentiation into planning lessons and schemes of work It describes workable strategies for managing the most common behaviour difficulties and meeting special needs in language literacy and mathematics At a whole school level it offers practical guidance on reviewing special needs policies assessment record keeping and the management of roles and resources The focus is on the way in which schools can do a good job in meeting special needs themselves within the everyday constraints of time money and energy and in so doing provide genuinely inclusive opportunities for all children This edition has been comprehensively updated and rewritten to cover the revised SEN Code of Practice and related legislation new directions in inclusion and all the major curriculum initiatives now in place in primary schools

Planning, Teaching and Class Management in Primary Schools Denis Hayes, 2003 This second edition has been fully updated in line with the standards for Qualified Teacher Status QTS 202 It will prepare student trainee teachers to meet the competencies required for the Teaching Standards The author looks at Professional values and practice Planning and Targets Monitoring and Assessment Teaching and Class Management Written in a lucid and engaging style it offers the reader a well informed set of insights into the complexities challenges and opportunities presented by the new requirements Checklists diagrams and clearly defined sections for key areas make this book extremely accessible for trainee teachers class teachers and mentors It is essential reading for all those who want to clearly understand the ideas behind and practical application of the standards

A Guide to Classroom Observation Rob Walker, Clem Adelman, 1975 Schools teaching observation *The Head Teachers Review*, 1967 **Teaching Arithmetic**, 1968 *The New Era in Home and School*, 1967 **Sharing Maths Learning with Children** Pat Costello, Marj Horne, John Keith Munro, 1991 This book develops an approach to helping children with their maths in a family context and presents strategies for helping children to start maths tasks that otherwise would cause

frustration It examines ways of talking to children about mathematics how mathematics is learnt and how working together gives us all a better understanding of maths The contents include recommended materials for support glossary of some common mathematical terms a national statement on girls and mathematics and a national statement on the use of calculators for mathematics in Australian schools
