Modi Di Pensare Postdarwiniani:

Methods, Models, Simulations and Approaches Towards a General Theory of Change Gianfranco Minati, 2012 Other approaches are based on considering 1 periodic changes in structure as for processes of self organisation 2 non periodic but coherent changes in structure as for processes of emergence 3 the quantum level of description Papers in the book study the problem considering its transdisciplinary nature i e systemic properties studied per se and not within specific disciplinary contexts The aim of these studies is to outline a transdisciplinary theory of change in systemic properties Such a theory should have simultaneous corresponding and eventually hierarchical disciplinary aspects as expected for a general theory of emergence

Nature and History Ignazio Masulli, 2019-06-07 Originally published in 1990 Nature and History examines how Darwin's theory of evolution has been expanded by scholars and researchers to include virtually every scientific discipline The book presents a morphological analysis of historical and social sciences sciences which have traditionally have been viewed as too random in their progressions to conform to a model Through the evaluation of empirical and factual evidence the book builds a case for an evolutionary paradigm which encompasses both natural and social sciences and presents the forms adaptiveness in working historical models
