Table of Contents Introduction

Secondary students are more difficult to deal with today than ever before. They act out and defy authority in ways that students in the 50's and 60's would never have dared. In many cases educators cannot even turn to parents for help. Many parents are either unable or unwilling to cooperate with the school in disciplining their teenage children. This leaves you, the educator, in a difficult position.

Assertive Discipline is a comprehensive program formulated to resolve behavior problems in the classroom from the moment the plan is implemented. This workbook is designed to help meet the specific needs of secondary students who are developing and carrying out an Assertive Discipline Plan.

The first section of this workbook gives the individual teacher guidelines for establishing an effective Discipline Plan geared to situations that occur within the classroom.

The second section discusses the administrative plan and how to handle problems in the common areas of the school.

As you read through each section, keep in mind that the key to solving discipline problems is consistency. You, the educator, must stand up with your expectations and standards. Secondary students need to know that every single time they misbehave they will be provided with a consequence.

In the same time you provide negative consequences, you must balance your disciplinary actions with positive support of students' commendable and appropriate behavior. Secondary students, though they may appear aloof and disinterested, do like and need positive reinforcement — at least to begin with.

One last point. Your Assertive Discipline Plan should be continually evaluated and adjusted. When it's not working, change it and get tougher. Never give up. If you remain determined in your efforts and attitude, you can solve the discipline problems you face, and then be able to go ahead and do what you do best — teach!
