Making Policy, Making Law Mark C. Miller, Jeb Barnes, 2004-08-23 The functioning of the U S government is a bit messier than Americans would like to think The general understanding of policymaking has Congress making the laws executive agencies implementing them and the courts applying the laws as written as long as those laws are constitutional Making Policy Making Law fundamentally challenges this conventional wisdom arguing that no dominant institution or even a roughly consistent pattern of relationships exists among the various players in the federal policymaking process Instead at different times and under various conditions all branches play roles not only in making public policy but in enforcing and legitimizing it as well This is the first text that looks in depth at this complex interplay of all three branches The common thread among these diverse patterns is an ongoing dialogue among roughly coequal actors in various branches and levels of government Those interactions are driven by processes of conflict and persuasion distinctive to specific policy arenas as well as by the ideas institutional realities and interests of specific policy communities Although complex this fresh examination does not render the policymaking process incomprehensible rather it encourages scholars to look beyond the narrow study of individual institutions and reach across disciplinary boundaries to discover recurring patterns of interbranch dialogue that define and refine contemporary American policy Making Policy Making Law provides a combination of

contemporary policy analysis an interbranch perspective and diverse methodological approaches that speak to a surprisingly overlooked gap in the literature dealing with the role of the courts in the American policymaking process It will undoubtedly have significant impact on scholarship about national lawmaking national politics and constitutional law For scholars and students in government and law as well as for concerned citizenry this book unravels the complicated interplay of governmental agencies and provides a heretofore in depth look at how the U S government functions in reality *The End of Government-- as We Know it* Elaine Ciulla Kamarck,2007 Looks at the ways in which government in the United States needs to change in order to cope with the challenges of the new century The author presents a new model which is more flexible and less bureaucratic **The Central Law Journal** ,1889 Vols 64 96 include Central law journal s international law list **Top Down Policymaking** Thomas R. Dye,2001 In his eye opening work Dye explodes the myth that public policy represents the demands of the people and that the making of public policy flows upward from the masses In reality Dye argues public policy in America as in all nations reflects the values interests and preferences of a governing elite Top Down Policymaking is a close examination of the process by which the nation s elite goes about the task of making public policy Focusing on the behind the scenes activities of money foundations policy planning organizations think tanks political campaign contributors special interest groups lobbyists law firms influence peddlers and the national news media Dye concludes that public policy is made from the top down
