Making the Grade Tony Wagner,2003-12-16 This book provides a guide for a long overdue public dialogue about why and how we need to reinvent our nation s schools How has the world changed for our children what do all students need to know in light of these changes how do we hold students and schools accountable for results what do good schools look like and what must leaders do to create more of these schools These are some of the questions that drive this book The answers emerging to these questions may surprise many The most successful public schools of the 21st century look a lot more like our 19th century village schools than our current factory model of schooling This book describes these new village schools that have been created in the last decade and suggests that they are a prototype for the schools of the future **Making**

the Grade Howard Saul Becker, Everett Cherrington Hughes,1995-01-01 Based on three years of detailed anthropological observation this account of undergraduate culture portrays students academic relations to faculty and administration as one of subjection With rare intervals in crisis moments student life has always been dominated by grades and grade point averages The authors of *Making the Grade* maintain that though it has taken different forms from time to time the emphasis on grades has persisted in academic life From this premise they argue that the social organization giving rise to this emphasis has remained remarkably stable throughout the century Becker Geer and Hughes discuss various aspects of college life and examine the degree of autonomy students have over each facet of their lives Students negotiate with authorities the conditions of campus political and organizational life the student government independent student organizations and the student newspaper and preserve substantial areas of autonomous action for themselves Those same authorities leave them to run such aspects of their private lives as friendships and dating as they wish But when it comes to academic matters students are subject to the decisions of college faculties and administrators Becker deals with this continuing lack of autonomy in student life in his new introduction He also examines new phenomena such as the impact of grade inflation and how the world of real adult work has increasingly made professional and technical expertise in addition to high grades the necessary condition for success *Making the Grade* continues to be an unparalleled contribution to the studies of academics students and college life It will be of interest to university administrators professors students and sociologists [Making the Grade](#)
