Man Aggression:

Aggression in Man and Animals Roger N. Johnson, 1972 **What Causes Men's Violence Against Women?** Michele Harway, James M. O'Neil, 1999-09-09 Carefully organized and tightly edited this insightful book considers potential causes of men's violence against women utilizing a variety of theoretical perspectives. It summarizes what is known about the multiple causes of men's violence against women and the importance of identifying men's risk factors in order to prevent future violence. The editors' approach is unique but systematic. In chapter 2 the editors present a preliminary multivariate model that explains men's violence against women by identifying four content areas: macrosocietal, biological, gender role socialization, and relation factors. Within these four areas the editors develop thirteen preliminary hypotheses about the causes of men's violence against women. In the subsequent chapters the contributing authors critique or react to specific parts of the multivariate model and address one or more of the 13 hypotheses in the presentation of their own ideas about the causes of men's violence against women. In the concluding chapter the editors summarize the contributors' reactions to the original hypotheses by creating a revised multivariate model of risk factors for men's violence against women. The final model includes biological, socialization, psychological, psychosocial, relational, and macrosocietal factors. Furthermore, the model is explained through 13 theoretical propositions, 40 research hypotheses, and over 60 risk variables related to men's violence against women. The book closes with a discussion of men's protective resiliency and vulnerability factors, as well as future directions for theory development, advocacy, and the prevention of violence against women.

Man and Aggression Ashley Montagu, 1973. *Man and Aggression* was first published in 1968 as a direct challenge to the concept of man's instinctual aggressive drive. A concept advanced in the newly developing science of ethology, the study of the behavior of different species by the eminent ethologist Konrad Lorenz and popularized in books by Robert Ardrey. The appearance of subsequent critiques of the Lorenz thesis led the editor to enlarge and revise his original collection. This second edition contains eight additional essays strengthening the book's sustained and reasoned criticism of the still fashionable contention that ethologists can understand human behavior by observing that of lower animals. The nineteen authorities represented in this volume offer a fine dissection of this Hobbesian view of man. They note among other phenomena the proclivities of many kinds of mammals to live together harmoniously; they discuss the evidence for spontaneous aggression and distinguish between defensive and predatory killing; they probe the possible cultural sources of human aggression. Also included for the first time is an exploration of the ritual origin of cannibalism and an examination of the writings of Desmond Morris and Anthony Storr. The book's purpose remains in the words of the editor: to put the record straight, to correct what threatens to become an epidemic error concerning the causes of man's aggression, and to redirect attention to a consideration of the real causes of such behavior. Adapted from book jacket.

Out of Control Anne Campbell,1993 Psychologist and criminologist Anne Campbell listens to the voices of men and women as they describe their aggressive feelings and constructs an approach to the vexed topic of gender and aggression She argues that the crucial difference between female and male aggressiveness is that men see aggression as a means of gaining control over others while women see it as a loss of self control Daughters are deeply ashamed when they get angry but sons soon learn to associate aggression with courage and triumph The implications of this from rage within intimate relationships to violence in the streets and the attitude of the male establishment including the judiciary to women s anger and aggression are explored *The Psychoanalytic Review* ,1924 **Origins of Human Aggression** Gerard G.
