*Time-out in the Classroom* Howard M. Knoff, 2007 Effective Positive Behavioral Support Systems PBSS consist of three interdependent components a teaching students prosocial interpersonal problem solving and conflict resolution skills using an evidence based social skills program b teacher grade level and building wide accountability processes that provide students meaningful incentives and consequences that motivate their prosocial behavior and c staff and administrative consistency such that student behavior is reinforced and responded to when inappropriate in a constant fashion Time out is an incredibly powerful intervention that is used almost universally in most elementary and some middle schools as part of the accountability component of the PBSS system Unfortunately Time Out often is used incorrectly and inconsistently in most schools thereby decreasing its potential impact for both staff and students 13 13 This Electronic Book E Book describes the step by step school wide implementation of an educative approach to Time Out When implemented across a school its potential to be used consistently by staff with students is enhanced When implemented as an educative approach its potential to motivate behavioral change and to successfully hold students accountable for their inappropriate behavior similarly is increased This E Book's objectives are to a sensitize readers as to the need for and benefits of a school wide accountability system b provide explicit instruction in how to implement the educative Time Out process and c discuss the outcomes when it is used effectively The E Book is intended for school based practitioners especially administrators who are implementing school wide PBSS programs 13 13 More specifically the behavioral principles underlying the Time Out process will be discussed along with the four prerequisites that are needed prior to its school wide implementation and the intervention's integration into a set of school wide behavioral standards and expectations For example teachers and students need to understand the following facets of the Time Out process in order to successfully implement it the a Rationale behind the Time Out process b the Time Out %u201CRelease and Return%u201D Language c Expected Behaviors and Responses to various Time Out prompts d the four Time Out levels and how students enter and exit these levels and e critical Decision Rules used throughout the process Teachers and administrators also need to know how to collect and use data from the Time Out process and to determine if the intervention is successful or whether other interventions are needed 13 13 In the end if used correctly the Time Out process is an essential prerequisite component of a successful PBSS system Successful PBSS systems help to maximize students' academic achievement create safe school environments and positive school climates increase and sustain effective classroom instruction and reach out to parents to increase their involvement in these important areas 13
