**Improving International Capacity Development** J. Armstrong, 2013-05-07 Nothing is more important to a new fragile or developing nation than developing the capacity of its government to support national well being Every society is complex every government is complex Yet well intentioned international development aid born in an era of infrastructure projects continues to apply simplistic technical solutions to these wickedly complex development problems It s an outside in approach that rarely succeeds even by the development industry s own admission But out there amongst the billions of dollars of failed interventions there are bright spots of success places where capacity is harnessed not just for today but for tomorrow too What is working so well Drawing on research practical experience and stories of success Jim Armstrong explores these emerging approaches Participatory Research and Development for Sustainable Agriculture and Natural Resource Management Julian F. Gonsalves, 2005 Intended for aspiring and new practitioners of Participatory Research and Development PR D as well as field based researchers in developing countries Highlights that agricultural research and development has become a joint approach to deal with diverse biophysical environments multiple livelihood goals rapid

changes in local and global economies and an expanded range for stakeholders over agriculture and natural resources

**Measuring Effectiveness in Humanitarian and Development Aid** Andre M. N. Renzaho, 2007 Donor countries are currently scaling up their aid programmes in response to strategies proposed through the Millennium Development Goals Recent positive research on the impact of foreign development aid has led to increased expectations on the part of donor countries Research suggests that per capita income growth over the last decade would have been lower in the absence of aid and also that public sector expenditure on health and education in developing countries would not have been as great without aid inflows However there still remain many significant gaps in knowledge on aid allocation and effectiveness This book addresses a number of these gaps and provides many new and important analytical insights into aid Among the topics covered are the interface between aid allocation and perceptions of aid effectiveness the inter recipient concentration of aid from non government organizations the year on year volatility of aid impacts of aid on public sector fiscal aggregates and evaluation of the country level impacts of aid The book is an essential companion for professionals engaged in aid policy reforms and also for scholars in the areas of development economics international finance and economics **Outcome**
