

**Murder in South Africa: a
comparison of past and present,
first edition**

This paper looks at a history of murder in South Africa. The official statistics in the New South Africa (since 1994) show that violent crime has had the greatest increase of all crime categories. Murder is a sub-category of "violent crime". The official state statistics claim that while, since 1994, all sub-categories of "violent crime" are on the increase, murder is the only sub-category on the decrease. However, these statistics are contested, for example, Interpol have South African murder statistics that are roughly double the official South African state statistics, while the South African Medical Research Council claim there are roughly a third more murders in South Africa than the official police statistics reveal. This casts doubt on the New South African government's claim that the murder rate has in fact decreased since 1994.

Unsound Empire Catherine L. Evans, 2021-09-28 A study of the internal tensions of British imperial rule told through murder and insanity trials

Unsound Empire is a history of criminal responsibility in the nineteenth century British Empire told through detailed accounts of homicide cases across three continents If a defendant in a murder trial was going to hang he or she had to deserve it Establishing the mental element of guilt criminal responsibility transformed state violence into law And yet to the consternation of officials in Britain and beyond experts in new scientific fields posited that insanity was widespread and growing and evolutionary theories suggested that wide swaths of humanity lacked the self control and understanding that common law demanded Could it be fair to punish mentally ill or allegedly uncivilized people Could British civilization survive if killers avoided the noose

Black 1968 Timothy H. Parsons, 2025-02-25 Initially the 1960s was a time of understandable optimism The civil rights movement and the legislation it inspired suggested an end to institutionalized racism in the United States while in the Global South the emergence of independent states anticipated political liberation and increased prosperity So when racial discrimination entrenched privilege cold war politics and fiscal reality dashed these hopes later in

the decade the world experienced a wave of protests Conventional narratives of 1968 focus on student strikes revolutions and coups assassinations and the reactionary backlash that they inspired The chapters of Black 1968 reveal the imperfectly documented and heretofore unrecognized bonds that led peoples of African descent around the world to articulate new global conceptions of Blackness as a way to mount local challenges to racism segregation colonialism economic exploitation generational authority and cultural chauvinism This book will be of interest to general readers interested in the global 1968 as well as scholars of Blackness and global history
