**Donor Portraits in Byzantine Art** Rico Franses,2018-11-15 This book explores the range of images in Byzantine art known as donor portraits It concentrates on the distinctive supplicatory contact shown between ordinary mortal figures and their holy supernatural interlocutors The topic is

approached from a range of perspectives including art history theology structuralist and post structuralist anthropological theory and contemporary symbol and metaphor theory Rico Franes argues that the term donor portraits is inappropriate for the category of images to which it conventionally refers and proposes an alternative title for the category contact portraits He contends that the most important feature of the scenes consists in the active role that they play within the belief systems of the supplicants They are best conceived of not simply as passive expressions of stable pre existing ideas and concepts but as dynamic proponents in a fraught constantly shifting landscape The book is important for all scholars and students of Byzantine art and religion Belgium and Holland Karl Baedeker (Firm),1885 The Critic ,1886 **The Educational Review** ,1893 **Scotia** ,1911
