School Politics Chicago Style:

School Politics, Chicago Style Paul E. Peterson, 1981 **The Politics of School Reform, 1870 - 1940** Paul E. Peterson, 1985-07 Was school reform in the decades following the Civil War an upper middle class effort to maintain control of the schools Was public education simply a vehicle used by Protestant elites to impose their cultural ideas upon recalcitrant immigrants In *The Politics of School Reform 1870 1940* Paul E Peterson challenges such standard revisionist interpretations of American educational history Urban public schools he argues were part of a politically pluralistic society Their growth both in political power and in sheer numbers had as much to do with the demands and influence of trade unions immigrant groups and the public more generally as it did with the actions of social and economic elites Drawing upon rarely examined archival data Peterson demonstrates that widespread public backing for the common school existed in Atlanta Chicago and San Francisco He finds little evidence of systematic discrimination against white immigrants at least with respect to classroom crowding and teaching assignments Instead his research uncovers solid trade union and other working class support for compulsory education adequate school financing and curricular modernization Urban reformers campaigned assiduously for fiscally sound politically strong public schools Often they had at least as much support from trade unionists as from business elites In fact it was the business backed machine politicians from San Francisco s William Buckley to Chicago s Edward Kelly who deprived the schools of funds At a time when public schools are being subjected to searching criticism and when new educational ideas are gaining political support *The Politics of School Reform 1870 1940* is a timely reminder of the strength and breadth of those groups that have always supported free public schools **Race, Politics and Money** Travis T. Johnson, 1994 *Teachers and Reform* John F. Lyons, 2008 Measuring the impact of the Chicago Teachers Union on public education in Chicago Mayors in the Middle Jeffrey R. Henig, Wilbur C. Rich, 2020-12-08 Desperate to jump start the reform process in America s urban schools politicians scholars and school advocates are looking increasingly to mayors for leadership But does a stronger mayoral role represent bold institutional change with real potential to improve big city schools or just the latest in the copycat world of school reform du jour Is it democratic Why have efforts to put mayors in charge so often generated resistance along racial dividing lines Public debate and scholarly analysis have shied away from confronting such issues head on *Mayors in the Middle* brings together for students of education policy and urban politics as well as scholars and school advocates the most thoughtful and original analyses of the promise and limitations of mayoral takeovers of schools Reflecting on the experience of six cities Baltimore Boston Chicago Detroit Cleveland and Washington D C ten of the nation s leading experts on education politics tackle the question of whether putting mayors in charge is a step in the right direction Through the case studies and the wide ranging essays that follow and build upon them the contributors Stefanie Chambers Jeffrey R Henig Kenneth J Meier Jeffrey Mirel Marion Orr John Portz Wilbur C Rich Dorothy Shipps and Clarence N Stone begin the process of answering questions critical to the future of inner city children the prospects for

urban revitalization and the shape of American education in the years to come **Urban Education in the United States** J. Rury,2005-04-30 Urban Education in the United States examines the development of schools in the large cities of the USA John Rury a well known historian of education introduces and highlights the most significant and classic essays dealing with urban schooling in this collection Urban Education in the United States will provide an introduction to critical themes in the history of city schools and will frame each section with an overview of urban education research during particular periods in US history *A Political Education* Elizabeth Todd-Breland,2018-10-03 In 2012 Chicago s school year began with the city s first teachers strike in a quarter century and ended with the largest mass closure of public schools in U S history On one side a union leader and veteran black woman educator drew upon organizing strategies from black and Latinx communities to demand increased school resources On the other side the mayor backed by the Obama administration argued that only corporate style education reform could set the struggling school system aright The stark differences in positions resonated nationally challenging the long standing alliance between teachers unions and the Democratic Party Elizabeth Todd Breland recovers the hidden history underlying this battle She tells the story of black education reformers community based strategies to improve education beginning during the 1960s as support for desegregation transformed into community control experimental schooling models that pre dated charter schools and black teachers challenges to a newly assertive teachers union This book reveals how these strategies collided with the burgeoning neoliberal educational apparatus during the late twentieth century laying bare ruptures and enduring tensions between the politics of black achievement urban inequality and U S democracy Innovations in Urban Politics Dr Jonathan S. Davies,Jonathan Davies,2007-12-13 Previously published as a special issue of Policy Studies this volume demonstrates the vitality of the field of urban politics and presents future challenges for urban political research in the years ahead If it does not already the population of cities will very soon make up more than half the global population As the global urban population continues to expand the challenges facing urban politics grow with it How do we understand the relationship between politics and urban policy What are the political challenges facing citizens and politicians in a radically unequal developing country like South Africa How are patterns of urban governance institutionalised How might we understand the changing relationship between hierarchies markets and networks And is it possible to develop a genuinely comparative urban politics in countries as different as Canada South Africa and Bangladesh Drawing together the work of new and established scholars from the UK Canada the US and South Africa in an impressive and wide ranging collection of articles this book demonstrates the contribution of urban scholarship to answering these questions **School Reform, Corporate Style** Dorothy Shipps,2006 Like other big city school systems Chicago s has been repeatedly reformed over the last century Yet its schools have fallen far short of citizens expectations and left a gap between the performances of white and minority students Many blame the educational establishment for resisting change Other critics argue that reform occurs too often still others claim it comes not often enough Dorothy Shipps

reappraises the tumultuous history of educational progress in Chicago revealing that the persistent lack of improvement is due not to the extent but rather the type of reform Throughout the twentieth century managerial reorganizations initiated by the business community repeatedly altered the governance structure of schools as well as the relationships of teachers to children and parents but brought little improvement while other more promising reform models were either resisted or crowded out Shipp's chronicles how Chicago's corporate actors led abetted or restrained nearly every attempt to transform the city's school system then asks whether schools might be better reformed by others To show why city schools have failed urban children so badly she traces Chicago's reform history over four political eras revealing how corporate power was instrumental in designing and revamping the system Her narrative encompasses the formative era of 1880-1930 when teachers unions moderated business plans previously unexplored business activism from 1930 to 1980 when civil rights dominated school reform and the decentralization of the 1980s She also covers the uneasy cooperation among business associations in the 1990s to install the mayor as head of the school system a governing regime now challenged by privatization advocates Business people may be too wedded to a stunted view of educators to forge a productive partnership for change Unionized teachers bridle at the second class status accorded them by managers If reform is to reach deeply into classrooms Shipp's concludes it might well require a new coalition of teachers unions and parents to create a fresh agenda that supersedes corporate interests This study clearly shows that in Chicago as elsewhere urban schooling is intertwined with politics and power By reviewing more than a century of corporate efforts to make education work Shipp's makes a strong case that it's high time to look elsewhere perhaps to educators themselves for new leadership

Class Politics and Public Schools Julia Wrigley, 1982 **Michigan Journal of Political Science**, 1993 **Changing Urban Education** Clarence Nathan Stone, 1998 With critical issues like desegregation and funding facing our schools dissatisfaction with public education has reached a new high Teachers decry inadequate resources while critics claim educators are more concerned with job security than effective teaching Though urban education has reached crisis proportions contending players have difficulty agreeing on a common program of action This book tells why **Changing Urban Education** confronts the prevailing naivete in school reform by examining the factors that shape reinforce or undermine reform efforts Edited by one of the nation's leading urban scholars it examines forces for change and resistance in urban education and proposes that the barrier to reform can only be overcome by understanding how schools fit into the broader political contexts of their cities Much of the problem with our schools lies with the reluctance of educators to recognize the profoundly political character of public education The contributors show how urban political contexts vary widely with factors like racial composition the role of the teachers union and relations between cities and surrounding metropolitan areas Presenting case studies of original field research in Baltimore Chicago Houston and six other urban areas they consider how resistance to desegregation and the concentration of the poor in central urban areas affect education and they suggest how cities can build support for

reform through the involvement of business and other community players By demonstrating the complex interrelationship between urban education and politics this book shows schools to be not just places for educating children but also major employers and large spenders of tax dollars It also introduces the concept of civic capacity the ability of educators and non educators to work together on common goals and suggests that this key issue must be addressed before education can be improved Changing Urban Education makes it clear to educators that the outcome of reform efforts depends heavily on their political context as it reminds political scientists that education is a major part of the urban mix While its prognosis is not entirely optimistic it sets forth important guidelines that cannot be ignored if our schools are to successfully prepare children for the future

The Annals of the American Academy of Political and Social Science, 1977-05 **Governing Buildings and Building Government** Bryan D.
