

Science and Mormonism

AN INTERVIEW BETWEEN

Dr. Wayne B. Hales, B. Y. U. Faculty and George Strebel, Student

*RADIO PROGRAM
SUNDAY, FEB. 27, 1938
KSL 9:30 P.M.*

A conversation between George Strebel, a student at Brigham Young University, and Dr. Wayne B. Hales, professor of physics, on the subject of "Science and Mormonism," Radio Station KSL, Sunday evening, February 27, 1938.

IT is quite traditional for religious people to feel that a deeply religious or spiritual life is incompatible with a highly intellectual life, as found in the field of sciences and philosophy. Traditional, I say, because very soon after the death of Christ the leaders of the church and the leaders of the intellectual groups began to look askance upon each other. Hypatia, a distinguished lecturer on philosophy, was murdered in 441 by a mob of monks, and in 529 the great school of Athens was closed by the order of the church and the Emperor. In the thirteenth century through the influence of the clergy Roger Bacon was imprisoned for 24 years for using the experimental method to learn new truths. In the later sixteenth century Nicholas Copernicus was suppressed. Giordano Bruno was burned at the stake and later the great Galileo was forced to recant his beliefs, all because they believed and taught that the earth and not the sun and stars moved to give them their apparent diurnal motion, while the church

people quoted the Bible to prove that Joshua commanded the sun and not the earth to stand still. As late as 1847 the clergy persecuted the Scottish physician James Y. Simpson because he advocated the use of anaesthesia in obstetrical cases on the ground that it would help to avoid that "Primeval Curse on Women."

Church Attitude

Q. Dr. Hales, you have given some interesting conflicts between leaders in religion and leaders in science, but those events took place long ago. What has been the attitude of the Mormon Church, toward these problems?

A. Of course, all churches have become more liberal of late years, but the Mormon Church has always welcomed any and every new truth which makes for life improvement, and enjoyment. One of its fundamental tenets states "If there is anything virtuous, lovely, or of good report or praiseworthy, we seek after these things."

President Brigham Young expressed the Church's attitude toward science in an effective and practical way many years ago. "If any of the elders are disposed to give a lecture to parents and children on letters, on the rudiments of the English language, it is in my religion, it is part of my faith. Or if an elder shall give us a lecture upon astronomy, chemistry or geology, our religion embraces it all. It matters not what the subject may be, if it tends to improve the mind, ex-

Science And Mormonism:

The Search for Harmony Gene Allred Sessions, Craig J. Oberg, 1993 The conservatives science often seems to be at cross purposes with God as anthropologists dig up hominids astronomers talk about the end of the universe quantum physicists dismiss the possibility of prophecy and genetic researchers produce offspring from a single parent Traditionalists wonder where the divine order is in all of this There was a time when Latter day Saints seemed impervious to such theological conundrums The assumption was that LDS teachings were scientific and that research would prove the truth of Mormonism Books were written about rational theology and Joseph Smith as scientist Students at church schools celebrated Darwin s birthday without hint of controversy believing that evolution confirmed eternal progression In *The Search for Harmony* fifteen scholars document the striking reversal over the past half century beginning with Joseph Fielding Smith s and James E Talmage s clash over the age of the earth Although the church sided with Talmage at the time the membership eventually accepted Smith s views and the rhetoric of other church leaders sermons became increasingly hostile toward empiricism Contributors suggest that this antagonism could be averted to the benefit of the church They explain why in light of the details of both science and LDS theology [Mormon Essays: Science and Mormonism, a Study of Harmony and Conflict; Joseph Smith and Science: the Methodist Connection; the Book of Abraham: Toward a Comprehensive Theory of the Text; the House of Israel in Mormon Theology](#) Michael T.
