*Human Development* D. A. Louw, 1998      *The Effect of Parenting on Child and Adolescence Development* Yanfang Li, Bin-Bin Chen, Yufang Bian, Wenchao Ma, Lichan Liang, 2025-11-18 Families and parents have the most central and enduring influence on children's lives. Of all the modifiable factors that influence child and adolescent development and life course outcomes, the important role of parenting arouses the interest of many researchers. Exploring the effect of parenting on their children's social, emotional, adjustment, mental health, and academic achievement and its underlying mechanism could provide an extremely important reference for early intervention, prevention, and treatment. Despite a large number of local, national, or international empirical studies in this field, some questions are still open for discussion, such as the underlying mechanism of the association between parents' cognition, parenting practices, and child development under a comprehensive system of parenting in a different demographic (e.g., racial, ethnic, and economic contexts), the changes of parenting accompanied with social change and era development, the interaction of parenting and other factors within family system or other external systems (e.g., school) and so on. For this Research Topic, we adopt a broad definition of parenting, including parents' opinions and feelings about their own parenting roles and parents' beliefs, attitudes, socialization goals, and parenting practices toward their children. The main aim is to explore the effect of parenting on child and adolescent development, including self, social, emotional, and academic development, which can help further design effective intervention programs to promote children's and adolescents' positive development via effective parenting. We are particularly interested in manuscripts focusing on the following research subtopics: 1. Theories and underlying mechanisms, mediators, or moderators to explain why and how could parenting affect child and adolescent development. 2. The associations between parenting and child development in different demographic contexts or at different times. 3. The similarities and discrepancies between children and parent report about parenting and its influence on the child and adolescent development. 4. The specific effect of paternal parenting or the effect of co-parenting on child and adolescent development. 5. The potential interaction effect of parenting and other factors such as teacher, peer, grandparent, and sibling on child and adolescent development. Quantitative studies (e.g., cross-sectional and longitudinal studies, cohort studies, experimental studies, intervention studies, meta-analysis) and qualitative studies (e.g., interview studies, observational studies, systematic review) are both welcome.      **New Challenges in the Research of Academic Achievement: Measures, Methods, and Results** Juan Luis Castejon, José Carlos Núñez, Raquel Gilar-Corbi, Iván Manuel Jorrín Abellán, 2021-02-24      **The Beginnings of School Readiness** Sarah Vanover, 2017-09-25 Many families and educators are concerned with the school readiness skills that children acquire in preschool; however, they do not realize that these skills begin to develop during the infant and toddler years. Infant and toddler caregivers need to recognize the importance of a high-quality infant and toddler learning environment and learn how they can support children while they acquire essential skills for future success.      **COVID-19: Mid- and Long-Term**

The Future of Children: Spring 2005 Cecilia Rouse, Jeanne Brooks-Gunn, Sara S. McLanahan, 2010-12-01 The Future of Children is a new semiannual publication that provides research and analysis to promote effective policies and programs for children This first issue focuses on School Readiness Closing Racial and Ethnic Gaps For more than 30 years researchers have seen white children outperform black and other minority children in tests of reading and math skills Though there is evidence that the gap has narrowed somewhat the very persistence of this racial and ethnic gap remains a source considerable concern for academics policy professionals and parents The ethnic and racial gaps appear to reach back to the preschool years When children reach the school door minority children exhibit lower school readiness skills at least those measured by standardized tests than their white counterparts From that point forward the

achievement gap only widens If policy professionals are to address this disparity in academic achievement and the consequent disparity in later opportunity the racial and ethnic gap must be examined in the very earliest years before students begin school with embedded inequalities This volume critically summarizes the research on the origin and trajectory of the racial and ethnic gap in the early years from several theoretical perspectives In particular research is analyzed to determine when these differences start to emerge in what areas they appear what factors contribute to their development by the time children enter grade school and what are the long term effects Contents Introducing the Issue of Test Score Ethnic and Racial Disparities Jeanne Brooks Gunn Sara McLanahan and Cecilia Elena Rouse Identifying Racial and Ethnic Differences in School Readiness Donald Rock and Jack Stenner Test Score Gaps The Contribution of Family and Neighborhood Characteristics Greg Duncan and Katherine Magnuson Genetic Differences and School Readiness William T Dickens Neuroscience Perspectives on Disparities in School Readiness Kim Noble B J Casey and Nim Tottenham Low Birth Weight and School Readiness Nancy Reichman The Impact of Health on School Readiness Janet Currie Parenting Jeanne Brooks Gunn and Lisa Markman Childcare and Early Education Katherine Magnuson and Jane Waldfogel Early to Rise Improving School Readiness Project,2001 *Challenging the School Readiness Agenda in Early Childhood Education* Miriam B. Tager,2017-03-27 Challenging the normative paradigm that school readiness is a positive and necessary objective for all young children this book asserts that the concept is a deficit based practice that fosters the continuation of discriminatory classifications Tager draws on findings of a qualitative study to reveal how the neoliberal agenda of school reform based on high stakes testing sorts and labels children as non ready affecting their overall schooling careers Tager reflects critically on the relationship between race and school readiness showing how the resulting exclusionary measures perpetuate the marginalization of low income Black children from an early age Disrupting expected notions of readiness is imperative to ending practices of structural classism and racism in early childhood education *Children's Play* Edward Zigler,Dorothy G. Singer,Sandra J. Bishop-Josef,2004 Extensive empirical research has documented the value of play for both cognitive and social development Despite the evidence educators and policy makers are eliminating the free play periods that have long been a central part of a young child s experience in preschool and childcare In Children s Play leading experts in play research child development and early childhood education examine recent policy decisions and demonstrate the importance of play in helping children learn basic literacy skills social awareness and creative problem solving Readers will also find a comprehensive summary of the developmental benefits of play examples of how research has been applied in practice a multicultural perspective on play and ideas for how to play imaginative games with children **School Readiness and the Transition to Kindergarten in the Era of Accountability** Robert C.
