Other Mind and Body The Nature of Mind and Psychological Explanation Each section begins with an introduction that discusses the issues and problems that arise in the various selections and shows how each author approaches them In addition a general introduction gives a concise overview of the subject and provides a historical context for the readings Representative works of seventeenth and eighteenth century thinkers such as Descartes Locke and Reid provide a solid foundation for the copious selections from contemporary philosophers that follow among them articles by Fodor Dennett Nagel Putnam Davidson Searle Ryle Strawson Burge Chisholm Rorty and Sellars With sixty two selections in all The Nature of Mind is an invaluable resource for anyone interested in this central philosophical topic *Philosophy of Mind* Tim Bayne,2021-11-15 Developments in the philosophy of mind over the last 20 years have dramatically changed the nature of the subject In this major new introduction Tim Bayne presents an outstanding overview of many of the key topics problems and debates taking account not only of changes in philosophy of mind itself but also of important developments in the scientific study of the mind The following topics are discussed in depth What distinguishes a physicalist conception of the mind Behaviourism the identity theory functionalism and eliminativism as accounts of the mental The nature of perception including the issue of perceptual transparency the admissible contents of perception and the question of unconscious perception The nature of thought including the language of thought hypothesis Searle s Chinese room argument and the Turing test The basis of intentional content Externalist accounts of content and the extended mind thesis Consciousness based objections to physicalism and illusionist and panpsychist conceptions of consciousness Theories of consciousness including methodological issues in the study of consciousness Mental causation including both philosophical and scientific challenges The problem s of other minds including knowledge of non human minds Self knowledge Personal identity and the nature of the self The book features a number of boxes that provide a more in depth look at particular issues Also included are chapter summaries guides to further reading and a helpful glossary of terms Written by a leading figure in the field *Philosophy of Mind An Introduction* is an invaluable core text for any student coming to philosophy of mind for the first time
