## **Natural Particulars:**

**Natural Particulars** Anthony Grafton, Nancy G. Siraisi, 1999 Recently the history of science in early modern Europe has been both invigorated and obscured by divisions between scholars of different schools One school tends to claim that rigorous textual analysis provides the key to the development of science whereas others tend to focus on the social and cultural contexts within which disciplines grew This volume challenges such divisions suggesting that multiple historical approaches are both legitimate and mutually complementary *Tradition, Rationality, and Virtue* Thomas D. D'Andrea, 2017-09-29 Tradition Rationality and Virtue provides the first comprehensive and detailed treatment of the work of Alasdair MacIntyre In this book Thomas D Andrea presents an accessible critical study of the full range of MacIntyre's thought across ethical theory psychoanalytic theory social and political philosophy Marxist theory and the philosophy of religion Moving from the roots of MacIntyre's thought in ethical inquiry this book examines MacIntyre's treatment of Marx Christianity and the nature of human action and discusses in depth the development and applications of MacIntyre's After Virtue project The book culminates in an examination of major internal and external criticisms of MacIntyre's work and a consideration of its future directions *Secrets and Knowledge in Medicine and Science, 1500-1800* Alisha Rankin, 2016-04-01 Secrets played a central role in transformations in medical and scientific knowledge in early modern Europe As a new fascination with novelty began to take hold from the late fifteenth century Europeans thirsted for previously unknown details about the natural world new plants animals and other objects from nature new recipes for medical and alchemical procedures new knowledge about the human body and new facts about the way nature worked These secrets became popular items of commerce and trade as the quest for new and exclusive bits of information met the vibrant early modern marketplace Whether disclosed widely in print or kept more circumspect in manuscripts secrets helped drive an expanding interest in acquiring knowledge throughout early modern Europe Bringing together international scholars this volume provides a pan European and interdisciplinary overview on the topic Each essay offers significant new interpretations of the role played by secrets in their area of specialization Chapters address key themes in early modern history and the history of medicine science and technology including the possession circulation and exchange of secret knowledge across Europe alchemical secrets and laboratory processes patronage and the upper class market for secrets medical secrets and the emerging market for proprietary medicines secrets and cosmetics secrets and the body and finally gender and secrets

**Classifying Reality** David S. Oderberg, 2013-02-25 Distinguished metaphysicians examine issues central to the high profile debate between philosophers over how to classify the natural world and discuss issues in applied ontology such as the classification of diseases Leading metaphysicians explore fundamental questions related to the classification and structure of the natural world An essential commentary on issues at the heart of the contemporary debate between philosophy and science Interweaves discussion of overarching themes with detailed material on applied ontology **Conservation**

**Reconsidered** Charles T. Rubin, 2000 The prominent contributors in *Conservation Reconsidered* establish a fundamentally original view of the conservation movement and the impact of public policy on nature This collection of essays articulate the belief that the thinkers and actors who helped develop the conservation movement notably John Muir Theodore Roosevelt Gifford Pinchot and Aldo Leopold have been seriously misunderstood by scholars who have analyzed them in the context of contemporary environmental debates Conservationism the contributors argue was a diverse movement dealing with difficult questions about the relationship of human beings to nature in a modern liberal democratic state The essays place conservationism within the framework of 19th century American political thinkers including Darwin Emerson Thoreau and Olmsted and they illuminate perennial questions about citizenship and our place in the natural world *Conservation Reconsidered* takes a new look at what is problematic about the legacy of American conservationism and explores worthy alternatives to the dominant environmentalist thinking of today [Catalogue](#) Maggs Bros, 1928 **Theological Works:**

**The heavenly arcana disclosed ... which are in Genesis [v. 1-11] [and] in Exodus [v. 12-19]** Emanuel Swedenborg, 1907 *The School of Montaigne in Early Modern Europe* Warren Boutcher, 2017-03-09 This major two volume study offers an interdisciplinary analysis of Montaigne's *Essais* and their fortunes in early modern Europe and the modern western university Volume one focuses on contexts from within Montaigne's own milieu and on the ways in which his book made him a patron author or instant classic in the eyes of his editor Marie de Gournay and his promoter Justus Lipsius Volume two focuses on the reader writers across Europe who used the *Essais* to make their own works from corrected editions and translations in print to life writing and personal records in manuscript The two volumes work together to offer a new picture of the book's significance in literary and intellectual history Montaigne's is now usually understood to be the school of late humanism or of Pyrrhonian scepticism This study argues that the school of Montaigne potentially included everyone in early modern Europe with occasion and means to read and write for themselves and for their friends and family unconstrained by an official function or scholastic institution For the *Essais* were shaped by a battle that had intensified since the Reformation and that would continue through to the pre Enlightenment period It was a battle to regulate the educated individual's judgement in reading and acting upon the two books bequeathed by God to man The book of scriptures and the book of nature were becoming more accessible through print and manuscript cultures But at the same time that access was being mediated more intensively by teachers such as clerics and humanists by censors and institutions by learned authors of past and present and by commentaries and glosses upon those authors Montaigne enfranchised the unofficial reader writer with liberties of judgement offered and taken in the specific historical conditions of his era The study draws on new ways of approaching literary history through the history of the book and of reading The *Essais* are treated as a mobile transnational work that travelled from Bordeaux to Paris and beyond to markets in other countries from England and Switzerland to Italy and the Low Countries Close analysis of editions paratexts translations and annotated copies is informed by a distinct

concept of the social context of a text The concept is derived from anthropologist Alfred Gell's notion of the art nexus the specific types of actions and agency relations mediated by works of art understood as indexes that give rise to inferences of particular kinds Throughout the two volumes the focus is on the particular nexus in which a copy an edition an extract is embedded and on the way that nexus might be described by early modern people **Arcana Coelestia** Emanuel Swedenborg,1873 **The Victorian Law Reports** Victoria. Supreme Court,1919 *The New Statesman* ,1924 **The Journal of Geography** ,1923 **The Victorian Reports** ,1919 *The Encyclopædia Britannica* ,1893 *The Ontario Weekly Reporter and Index-digest* ,1911 Ontario Weekly Reporter and Index-digest Ontario,1911 Natural Science ,1896 **Transactions of the Watford Natural History Society and Hertfordshire Field Club** Watford Natural History Society and Hertfordshire Field Club,1878 The Inner Ocean George Kateb,1992 What is the meaning of individualism in a modern democracy In this rich and penetrating book a major political theorist examines the nature of individualism the concept of self it implies the ethic it sustains the personal connectedness it supports and the politics it requires and provides a challenging answer George Kateb argues that democracy is founded on respect for the dignity of individuals as individuals and that this respect transforms all human relations He uses the term democratic individuality to name some of the psychological cultural and spiritual effects of government's guarantee of rights Democratic individuality in his view is a way in which individuals whose rights are protected may dare to live the private lives and to conceive their roles as citizens
