Department of Agriculture. Economic Research Service,1974 U S land and water resources are analyzed as a basis for projecting national agricultural cropland and other land needs to the year 2000 Impact of changes in technology and resource development as well as environmental and institutional factors affecting the availability of these natural resources are discussed Emphasis is placed on the continuing responsibility of federal State and local governments to assess the adequacy of our natural resources to meet future needs and to improve the quality of the environment [Our Land and Land Policy, National and State](#) Henry George,2013-09 This historic book may have numerous typos and missing text Purchasers can usually download a free scanned copy of the original book without typos from the publisher Not indexed Not illustrated 1871 edition Excerpt over estimated it and for an obvious reason A true statement of the real value of the grant would tend to discredit the whole affair in the eyes of the cautious foreign capitalists from whom the Company seeks to borrow money for they would not believe that any Government could be extravagant enough to make such a donation But it must be remembered that the line of the Northern Pacific passes for nearly its whole length through as fine an agricultural

country as that of Illinois that its grant consists in large part of immensely valuable timber and mineral land and that it will build up town after town one of them at least a great commercial city on its own soil Furthermore for reasons before stated the increase in the value of land during the next twenty years must be much greater than it has been in the last twenty years Taking these things into consideration is it too much to say that in twenty years from now the lands of the Company will have sold for or will be worth an average of at least 20 per acre At this rate the grant amounts to over half a million dollars per mile or in the aggregate to the enormous sum of 1 160 000 000 a sum more than half the National debt This donated absolutely to one corporation And for what For building a road which cannot cost more than eighty millions and for building it for themselves No keener satire upon our land grant policy could be written than that which is to be found in the published advertisement of this Northern Pacific Company The Directors show that if they get an average of but 2 per acre for their land they can pay the whole cost of building and equipping the road and have a surplus of some 20 000 000 left That is to say the Government might have built

Our land and land policy Henry George,1911 [Our Land and Land Policy](#) Henry George,2018-01-26 Excerpt from *Our Land and Land Policy* Speeches Lectures and Miscellaneous Writings The most important matter in this collection is that with which it opens *Our Land and Land Policy* given to the public for the first time since its original limited publication in 1871 when its author was only locally known in San Francisco as a newspaper writer It engaged with other work four months in the writing and was Mr George s first attempt to set forth the essentials of his philosophy Of it he said long afterwards Some thing like a thousand copies were sold but I saw that to command attention the work must be done more thoroughly The work was done more thoroughly in *Progress and Poverty* eight years later To that celebrated book *Our Land and Land Policy* bears the relation of acorn to oak Mr George towards the end of his life contemplated republishing the little work believing that it might interest many whom the larger book would not at first reach Death intervened between the plan and its carrying out Mr George thought of making such changes in *Our Land and Land Policy* as in his opinion would fit it more nearly to the present times but as his was the only hand that could properly do this is here presented precisely as he published 1871 About the Publisher *Forgotten Books* publishes hundreds of thousands of rare and classic books Find more at www.forgottenbooks.com This book is a reproduction of an important historical work *Forgotten Books* uses state of the art technology to digitally reconstruct the work preserving the original format whilst repairing imperfections present in the aged copy In rare cases an imperfection in the original such as a blemish or missing page may be replicated in our edition We do however repair the vast majority of imperfections successfully any imperfections that remain are intentionally left to preserve the state of such historical works
