

## Métodos cuantitativos para el análisis de políticas públicas

Cardozo Brum, Myriam\*

### Resumen

El artículo se propone analizar los aportes y limitaciones de los métodos cuantitativos en cada etapa del proceso de políticas públicas. Para ello se realiza una revisión documental que comienza con la definición del campo multidisciplinario que estudia estas políticas, revisando sus antecedentes, enfoques y fases de análisis. A continuación se exponen y analizan críticamente los diferentes métodos cuantitativos que se emplean en cada una de las últimas. También se realiza una síntesis de los principales asuntos discutidos respecto del tema en cuestión, en recientes años, evaluando las perspectivas futuras de estas aportaciones. Se concluye que los métodos cuantitativos constituyen una valiosa aportación, no siempre explorada, al Análisis de Políticas Públicas, siempre y cuando se tenga presente el conjunto de supuestos en que se fundamenta cada método, por lo tanto, sus limitaciones, y que éstos se complementen con estudios cualitativos que permitan una adecuada integración de las racionalidades técnica y política.

**Palabras clave:** Métodos cuantitativos, políticas públicas, proceso de enseñanza.

### *Quantitative Methods for the Analysis of Public Policy*

#### Abstract

This article analyses the advances and limitations of quantitative methods in each stage of the process of public policy analysis. In order to do this, a documentary revision was made beginning with the definition the multidisciplinary field that studies these policies, reviewing their antecedents, focuses and analytical phases. This is followed by an exposition and critical analysis of the quantitative methods used in each of the above fields. The principal themes discussed with respect to this topic in recent years are synthesized, evaluating the future perspectives of each contribution. The conclusion is that quantitative methods are a valuable support, and one that is not always taken into account in public policy analysis, but only when the set of suppositions that underlie each method, as
