## **Other Lulus:**

Lulu Vanessa Georgiana, 2013-05-24 Lulu is a tiny unique spider who sees the beauty within everyone Determined to never judge others by their looks but instead by their hearts and souls Lulu goes about his days playing hide and seek with his sisters and brothers With a white stripe down his blue back only five black eyes and eight legs Lulu knows he looks different than the rest of his family but that is okay Lulu loves himself from the inside out As Lulu begins his first day of school he is very excited to make new friends But when he arrives at school everyone ignores him including his teacher All the excitement about school begins to fade away Day after day Lulu is bullied called names and overlooked by everyone But even as Lulu battles prejudice at school there is even more tension at home After Lulus father abandons them and his mother falls ill Lulu must face the reality that those who do not understand judge Lulu is the poignant tale of a positively unique spider who despite all of lifes hardships holds onto the faith that everyone will one day see that we are all exceptional on Earth and beyond

**Big House on the Prairie** John M. Eason, 2017-03-06 Now more than ever we need to understand the social political and economic shifts that have driven the United States to triple its prison construction in just over three decades John Eason goes a very considerable distance here in fulfilling this need not by detailing the aftereffects of building huge numbers of prisons but by vividly showing the process by which a community seeks to get a prison built in their area What prompted him to embark on this inquiry was the insistent question of why the rapid expansion of prisons in America why now and why so many He quickly learned that the prison boom is best understood from the perspective of the rural southern towns where they tend to be placed North Carolina has twice as many prisons as New Jersey though both states have the same number of prisoners And so he sets up shop as it were in Forrest City Arkansas where he moved with his family to begin the splendid fieldwork that led to this book A major part of his story deals with the emergence of the rural ghetto abetted by white flight de industrialization the emergence of public housing and higher proportions of blacks and Latinos How did Forrest City become a site for its prison Eason takes us behind the decision making scenes tracking the impact of stigma a prison in my backyard not a likely desideratum economic development poverty and race while showing power sharing among opposed groups of elite whites vs black race leaders Eason situates the prison within the dynamic shifts rural economies are undergoing and shows how racially diverse communities can achieve the siting and building of prisons in their rural ghetto The result is a full understanding of the ways in which a prison economy takes shape and operates

**Garbage Wars** David Naguib Pellow, 2004-09-17 A study of the struggle for environmental justice focusing on conflicts over solid waste and pollution in Chicago In Garbage Wars the sociologist David Pellow describes the politics of garbage in Chicago He shows how garbage affects residents in vulnerable communities and poses health risks to those who dispose of it He follows the trash the pollution the hazards and the people who encountered them in the period 1880 2000 What unfolds is a tug of war among social movements government and industry over how we manage our waste who benefits

and who pays the costs Studies demonstrate that minority and low income communities bear a disproportionate burden of environmental hazards Pellow analyzes how and why environmental inequalities are created He also explains how class and racial politics have influenced the waste industry throughout the history of Chicago and the United States After examining the roles of social movements and workers in defining resisting and shaping garbage disposal in the United States he concludes that some environmental groups and people of color have actually contributed to environmental inequality By highlighting conflicts over waste dumping incineration landfills and recycling Pellow provides a historical view of the garbage industry throughout the life cycle of waste Although his focus is on Chicago he places the trends and conflicts in a broader context describing how communities throughout the United States have resisted the waste industry s efforts to locate hazardous facilities in their backyards The book closes with suggestions for how communities can work more effectively for environmental justice and safe sustainable waste management
