in itself is an accurate rendition of the great pyramid's structure and interior including the passageway and tomb at its center. Each aspect of the drawing has a corresponding letter with the smaller pyramids of Giza also appearing. The mystery behind how Giza's pyramids were built invited much speculation with the pyramidology movement rapidly growing in the late 19th century. The idea that God or a divine spiritual force had either singlehandedly made or contributed to the construction of the great pyramids was popular. For his part, Seiss considers the pyramid to be a great altar to the divine.

The Great Pyramid of Giza Janey Levy, 2006-08-01 Uses graphs, tables, and charts in making calculations about the exterior, interior, and angles of the Great Pyramid of Giza in order to demonstrate basic mathematical principles.
