**Evaluation of Translation Technology** Walter Daelemans, Véronique Hoste, 2010 This collection of scholarly articles asks the question How useful is translation technology Pointing to the need for a widely used and reliable way to test the efficiency of language translation programs the presenters show that commercial tools such as translation memories and translation workbenches are popular and their developers find them useful in terms of productivity consistency or quality However these claims are rarely proven using objective comparative studies and this group describes several new statistical approaches to more rigorous evaluation methods Product Description      **Computational Approaches to Assistive Technologies for People with Disabilities** N.J. Cercone, K. Naruedomkul, 2013-07-16 Assistive technologies have become increasingly important for people with disabilities in recent years This book is the result of over a decade of research into computational approaches to assistive technology Its chapters are based on a number of graduate theses successfully completed over the past dozen or so years under the supervision of Kanlaya Naruedomkul of Mahidol University in Bangkok Thailand and Nick Cercone of York University Toronto Canada Some applications in the chapters use Thai language examples but the techniques employed are not restricted to any single language Each chapter is based on the Ph D work of a former or current student suitably updated and presented for interested readers The book is divided into four sections Following an introduction which includes a review of assistive technology products part two covers applications and includes chapters on alternative sign text MT for language learning lexical simplification using word sense disambiguation and detecting and rating dementia through lexical analysis of spontaneous speech Part three deals with theories and systems and includes granules for learning behavior rough sets methods and applications for medical data and multimedia support systems as assistive technology for hearing impaired students Part four presents a conclusion which includes a look into the future Although this book is not a comprehensive treatise on assistive technology it nevertheless provides a fascinating look at recent research and will be of interest to all those whose work involves the application of assistive technologies for people with disabilities      *Translation Quality Assessment* Joss Moorkens, Sheila Castilho, Federico Gaspari, Stephen Doherty, 2018-07-13 This is the first volume that brings together research and practice from academic and industry settings and a combination of human and machine translation evaluation Its comprehensive collection of papers by leading experts in human and machine translation quality and evaluation who situate current developments and chart future trends fills a clear gap in the literature This is critical to the successful integration of translation technologies in the industry today where the lines between human and machine are becoming increasingly blurred by technology this affects the whole translation

landscape from students and trainers to project managers and professionals including in house and freelance translators as well as of course translation scholars and researchers The editors have broad experience in translation quality evaluation research including investigations into professional practice with qualitative and quantitative studies and the contributors are leading experts in their respective fields providing a unique set of complementary perspectives on human and machine translation quality and evaluation combining theoretical and applied approaches

Computer-Assisted Literary Translation Andrew Rothwell, Andy Way, Roy Youdale, 2023-11-30 This collection surveys the state of the art of computer assisted literary translation CALT making the case for its potential to enhance literary translation research and practice The volume brings together early career and established scholars from around the world in countering prevailing notions around the challenges of effectively implementing contemporary CALT applications in literary translation practice which has traditionally followed the model of a single translator focused on a single work The book begins by addressing key questions on the definition of literary translation examining its sociological dimensions and individual translator perspective Chapters explore the affordances of technological advancements and availability of new tools in such areas as post edited machine translation PEMT in expanding the boundaries of what we think of when we think of literary translation looking to examples from developments in co translation collaborative translation crowd sourced translation and fan translation As the first book of its kind dedicated to the contribution CALT in its various forms can add to existing and future scholarship this volume will be of interest to students and scholars in Translation Studies especially those working in literary translation machine translation and translation technologies
