Saudi Arabia Through the Eyes of an Artist Malin Basil,1979 Museums in Arabia Karen Exell,Sarina Wakefield,2016-05-12 Museum activity has in recent years undergone major and rapid development in the Arabian Peninsula with the regeneration of existing museums as well as the establishment of new ones Alongside such rapid expansion questions are inevitably raised as to the new challenges museums face in this region and whether the museum as a central focus of heritage preservation also runs the risk of overshadowing local forms of heritage performance and preservation With contributions from leading academics from a range of disciplines and heritage practitioners with first hand experience of working in the region this volume addresses the issues and challenges facing museums in Kuwait Saudi Arabia Qatar Yemen and the UAE It focuses on the themes of politics public engagement and the possibility of a new museum paradigm which might appropriately reflect the interests and culture of the region The interdisciplinary approaches analyse museum development from both an inside and outside perspective suggesting that museums do not follow a uniform trajectory across the region but are embedded within each states socio cultural context individual government agendas and political realities Including case study analysis which brings the more marginal nations into the debates as well as new empirical data and critical evaluation of the role of the museum in the Arabian Peninsula societies this book adds fresh perspectives to the study of Gulf heritage and museology It will appeal to regional and international practitioners and academics across the disciplines of museum studies cultural studies and anthropology as well as to anyone with an interest in the Gulf and Middle East

The Formation of Nabatean Art Joseph Patrich,2023-09-20 It is well known that during the Second Temple period the Jews of Judea strictly observed the injunction against graven images Although the Jews borrowed techniques and artistic styles from the surrounding Hellenistic Roman culture they abstained from using images in their art What is less well known is that during the same period a similar phenomenon was taking place in the adjacent Arab kingdom of Nabatea and this despite the fact that unlike the monotheistic Jews the Nabateans worshipped many deities In both kingdoms political independence went hand in hand with a cultural independence that expressed itself in religion language script and art Although continuity with iconoclastic Judea may have had some influence on Nabatean steadfastness to tradition under pressure from the dominant Hellenistic Roman culture it appears that their abstract perception of their gods and disregard for figurative art were innate growing out of a particular theological doctrine The principles of that doctrine have not been preserved but we can deduce its existence and to a lesser degree its nature on the basis of certain archaeological discoveries that we will discuss here subsequently Unlike the common practice both in the Greco Roman West and in the Parthian East to accord the gods a human form the Nabateans represented their gods in the form of a stele The abstract manner in which they perceived the form of their deities affected their approach towards figurative art A systematic survey of Nabatean art indicates that negation of figurative art is evident in all domains of their creativity Hundreds of years before the Nabatean civilization but in this same geographical area there was a similar religious and artistic phenomenon of venerating stele gods and negating figurative art among another Arabian tribe which scholars tend to identify with the biblical Midianites The same spiritual wellsprings that nourished a nonfigurative tradition among the North Arabian tribes for hundreds of years first the Midianites and then the Nabateans ultimately resurfaced nourishing the nonfigurative tendency we see in Islamic Arabian art This book examines the origins of prohibition of a graven image among the Nabateans its effect on all facets of Nabatean art and its subsequent influence on Islamic art several hundred years hence The implications for the history both of ancient religions and art lend to Nabatean

Street Art in the Middle East Sabrina de Turk,2019-06-27 Since the 2011 Arab Spring street art has been a vehicle for political discourse in the Middle East and has generated much discussion in both the popular media and

academia Yet this conversation has generalised street art and identified it as a singular form with identical styles and objectives throughout the region Street art s purpose is however defined by the socio cultural circumstances of its production Middle Eastern artists thus adopt distinctive methods in creating their individual work and responding to their individual environments Here in this new book Sabrina De Turk employs rigorous visual analysis to explore the diversity of Middle Eastern street art and uses case studies of countries as varied as Egypt Tunisia Lebanon Palestine Bahrain and Oman to illustrate how geographic specifics impact upon its function and aesthetic Her book will be of significant interest to scholars specialising in art from the Middle East and North Africa and those who bring an interdisciplinary perspective to Middle East studies
