Saving Endangered Species Robert W. Shumaker,2020-10-27 The amazing true stories of the greatest wildlife champions of our time Wildlife conservation is at a critical juncture While large charismatic mammals may be the first animals that come to mind the mere 3 000 wild tigers still in existence the giraffes declared endangered for the first time just last year it is not only these magnificent keystone species disappearing A full third of all studied birds reptiles and mammals have suffered devastating population losses and a third of all insects are now endangered including crucial pollinators that sustain worldwide food supply Over 15 000 animal species are now considered to be threatened with extinction There are however bright spots that provide optimism many of them due to the efforts of a small group of scientists and activists In Saving Endangered Species Robert W Shumaker brings together ten conservation heroes seven of them winners of the Indianapolis Prize three of them recipients of the Jane Alexander Global Wildlife Ambassador Award With moving immediacy each wildlife defender offers their unique perspective on the state of wildlife conservation and the future of the natural world Bringing to life their work in the field each contributor also explains key concepts in wildlife conservation reveals why they are important and discusses what kinds of work can be done to address biodiversity loss Contributors sharing their stories in their own words include George Schaller one of the founding fathers of wildlife conservation who conducted the field work that resulted in the establishment of the world s largest wildlife preserve the Arctic National Wildlife Refuge Iain Douglas Hamilton who is widely credited with developing the metrics and methods that stemmed the tide of elephant poaching for

ivory in Africa Steven Amstrup who discovered the disturbing truth that the sea ice polar bears rely on for traveling hunting and raising their young was disappearing Russell Mittermeier who has discovered over 20 new animal species conducted field work in more than 30 countries around the globe and authored 15 books on biodiversity Harrison Ford Academy Award winning actor who has been a passionate wildlife advocate and board member of Conservation International for over 25 years Sigourney Weaver three time Academy Award nominee whose work with the Dian Fossey Gorilla Fund has helped save thousands of gorillas in Rwanda and Congo This unique book aims to win new recruits inspire biologists and conservationists already in the field and illustrate the profession s fundamental scientific tenets through wildlife champions own exciting narratives Covering issues from reproduction and prey predator relationships to population dynamics and community engagement Saving Endangered Species also addresses such thorny topics as overhunting retaliatory killing by farmers development driven habitat loss and the illegal wildlife trade By encompassing a broad spectrum of subjects this volume ultimately gives readers a first person look into what it takes to dedicate oneself to the crucial field of wildlife conservation Contributors Jane Alexander Steven C Amstrup George Archibald Michael I Crowther Iain Douglas Hamilton Harrison Ford Carl Jones Russell Mittermeier George B Schaller Robert W Shumaker Sigourney Weaver Patricia Chapple Wright

Environmental Science 6e (paper) Daniel D. Chiras,2013 **Why Save Endangered Species?.** ,1982 **Keepers of the Animals** Michael J. Caduto,Joseph Bruchac,1997 Using stories to show the importance of wildlife in Native American traditions this book gives parents and teachers an exciting way to teach children about animals *Acting for Endangered Species* Shannon Petersen,2002 An accessible political and legal history of the Endangered Species Act **Saving Endangered Plants and Animals** James Bow,2008-09-30 A discussion of the reasons that plants and animals become extinct and what scientists are doing to prevent it *Last One Left* Jaedyn Moore,2006-10 **What Can We Do About Endangered Animals?** Suzanne Slade,2009-08-15 Explains the challenges facing endangered animals exploring the root causes of this issue and offering possible solutions Saving Endangered Mammals Thane Maynard,1992 Includes basic facts about a number of endangered mammals and gives information on the threats they face and on efforts to save them from extinction **How to Protect Endangered Animals - Animal Book Age 10 Children's Animal Books** Baby Professor,2017-04-15 Endangered animals need everyone s help regardless of age gender race and social status The first step to protecting endangered animals is to educate the young The purpose is to make children become aware of what endangered animals are where they can be found and what can be done to save them Read this book with your 10 year old today *Saving Endangered Animals* Alvin Silverstein, Virginia B. Silverstein, Robert A. Silverstein,1993 Focusing on wildlife species that are in danger of extinction the authors examine the struggle to maintain a balance between the needs of humans and animals *Biodiversity* Anne Elizabeth Maczulak,2010 Students with a basic understanding of the environment and concern for its future know the importance of preserving biological diversity Biodiversity is the variety of living things on

Earth or in a specific area This definition seems simple enough to understand yet the concept of biodiversity has deeper meanings that challenge even trained environmental scientists A region that has a wide variety of species in robust populations is said to possess biodiversity But not every place on Earth bursts with diverse life Biodiversity concentrates in certain areas while other parts of the globe possess a somewhat lesser variety and number of species

99 Jumpstarts for Kids Peggy Whitley, Susan Williams Goodwin, 2003-09-30 Similar to the previous 99 Jumpstarts to Research but designed for younger students this book helps teachers and librarians to teach basic research and information literacy skills to children To help them master the research process and narrow the limitless array of sources available on commonly researched topics in elementary and middle schools students are taught a basic note taking process and given specific source ideas and subject headings for each topic discussed This book will be an invaluable tool to help school librarians and teachers broach the difficult task of beginning to teach the research process Grades 3-8

Animals on the Edge Sandy Pobst, 2008 Stresses the importance of saving endangered species and discusses how scientists are using the latest technology to survey animal populations to track down and arrest those who prey on endangered wildlife and to breed animals in captivity

Environmental Science Daniel D. Chiras, 2006 Completely updated the seventh edition of Environmental Science enlightens students on the fundamental causes of the current environmental crisis and offers ideas on how we as a global community can create a sustainable future

Protecting Endangered Species Chunwang Li, 2024-10-29 The aim of this reprint is to immerse the reader in the latest studies on the conservation of endangered animals The global biodiversity loss is a growing problem and more species are becoming endangered and are at risk of extinction Due to the development of human society the space left for wildlife has become more limited Therefore saving endangered species and conserving biodiversity represent a matter of urgency Due to the vulnerability of endangered animals and their sensitivity to environmental degradation and human disturbance they need to be given more attention Therefore research on the conservation of endangered species has naturally become a hotspot in the field of ecology and conservation biology Studies have shown that animals adapt to the ambient environment through their physiological regulation and behavioral strategies Animals with strong ecological adaptability are able to resist uncertain changes in the environment However in the context of dramatic changes in the environment the species that are less adaptable require more attention In this reprint we collected 18 papers that relate to the conservation of endangered and threatened animals These papers cover some important aspects of endangered species conservation such as ecological adaptation of animals habitat alteration climate change population dynamics of endangered animals conservation translocation conservation genetics pollution effect on animals and construction of protected areas We hope that this reprint will allow readers to understand the current trends in the conservation of endangered animals
